Graphic Violence provides an innovative introduction to the relationship between violence and visual media, discussing how media consumers and producers can think critically about and interact with violent visual content. It comprehensively surveys predominant theories of media violence and the research supporting and challenging them, addressing issues ranging from social learning, to representations of war and terrorism, to gender and hyper-masculinity. Each chapter features original artwork presenting a story in the style of a graphic novel to demonstrate the concepts at hand. Truly unique in its approach to the subject and medium, this volume is an excellent resource for undergraduate students of communication and media theory as well as anyone interested in understanding the causes and effects of violence in media.

This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr.Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Addressing Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy.

This book provides a timely evaluation of the EU’s ability to act internationally and coordinate policy in a time when it also seeks to meet shifting demands of international cooperation. These include global sustainable development, the challenge of multilateralism and the changing geopolitical order. Analysing the networks of officials and policy professionals in EU development policy, the book yields theoretical insights into dominant processes that characterise EU governance in international cooperation and assesses their role for policy coordination. Overall, this book concludes that EU policy coordination evades intergovernmental control and demonstrates how the agency of EU institutions depends on efforts of member state officials to defend their priorities and identities. Finally, it shows the need to better understand the EU as a collective international actor, beyond the widespread concern with institutional adjustments, which continuously fail to produce the intended outcomes. This text will be of key interest to scholars and students of European and EU politics, EU foreign policy, EU external relations and more broadly to international relations and international development.

The literature on domestic violence will often treat homicide as its most extreme outcome. The reality is more nuanced, with many domestic homicides occurring within a history of abusive behaviour. This book offers a much-needed synthesis of the literature on domestic homicide, covering its history; the theories supporting it; its various forms such as filicide, intimate partner homicide, parricide, siblicide and familicide; and its prevention. The authors explore the predominant theories that have been used to explain domestic homicides in general, as well as specific subtypes of domestic homicide. Each chapter then takes a chronological approach in examining relationships between victim and perpetrator in the most prominent types of domestic homicide. Drawing on the empirical evidence, it offers a unique insight into the dynamics of domestic homicides, and debunks some of the common stereotypes surrounding it. The book concludes with an overview of the main areas of prevention of domestic homicide and offers recommendations for professionals working in domestic violence services, medical practitioners and mental health services. This book will be of interest to criminologists, psychiatrists, psychologists and sociologists alike, and will be key reading for a range of courses on violence, abuse and aggression.

Ditch Pressure for Freedom in Christ Any mom who has tried to create a godly home for her family knows it doesn’t happen automatically. Through books, blogs, and Instagram accounts, culture asserts that good moms must follow certain standards and abide by certain rules if she want what’s best for her children. She must do everything she can—and she must do it all just right. Following the suggested steps and recommended rules may seem best, but what if we’re missing the point? This is something Maggie Combs came to realize while seeking to be a good mom to her three sons. Though the world around us may have critical expectations and rules for mothering, Christ instead calls moms to an intimate, abiding relationship with a triune God. In *Motherhood Without All the Rules*, Maggie identifies the main “rules” moms today often feel pressured to follow and counters them with gospel truth. You’ll discover how the character of each member of the trinity practically impacts your role as a mom. Join Maggie in forgetting the rules, so that instead of being a good mom, you grow to become a holy mom.

Before the groundbreaking graphic novel *Watchmen*, Alan Moore made his debut in the U.S. comic book market with the revitalization of the horror comic book *Swamp Thing*. Moore's classic, critically acclaimed *Swamp Thing* stories are now collected with brand-new coloring in *Absolute Swamp Thing* by Alan Moore Vol. 1. In 1983, a revolutionary English writer joined a trio of trailblazing American artists to revitalize a longstanding comic book icon. By the time they'd finished their work four years later, *SWAMP THING* by Alan Moore, Stephen R. Bissette, John Totleben, and Rick Veitch was universally recognized as one of the handful of titles that defined a new era of complexity and depth in modern graphic storytelling, and their run on the series remains one of the medium's most enduring masterpieces. Now DC Comics and Vertigo are proud to present an all-new vision of this landmark achievement. Comprising three deluxe hardcover volumes, *ABSOLUTE SWAMP THING BY ALAN MOORE* debuts completely new coloring for every page, crafted exclusively for this definitive collector's edition by legendary color artist Steve Oliff (Akira, *Miracleman*). This first volume includes the issues *THE SAGA OF THE SWAMP THING #20-34* and *SWAMP THING ANNUAL #2* and features a monumental new afterword from Bissette accompanied by a wealth of historic behind-the-scenes material from the title's original creative team.

This book explores the conditions under which Nuclear Weapons Free Zones (NWFZs) can be established. It analyzes four hypotheses that explain the factors contributing to the formation of NWFZs, building upon realist, constructivist and liberal theories from international relations. Through structured focused comparison, the book presents and compares the emergence of NWFZs in Latin America, the South Pacific, Southeast Asia, Africa, Central Asia, and the Middle East, which is a prospect for a NWFZ. The book argues that NWFZ projects depend on the following conditions: the security interest of regional states in avoiding nuclear threats, preexisting regional institutions and regional economic cooperation, leadership by a core of

regional powers and shared interest in spreading non-proliferation norms. Democracy is not a necessary condition, but democratization can help overcome barriers presented by hesitant or opposed regional governments. As too many of the mentioned necessary conditions are lacking in the Middle East, a NWFZ project, thus, will be possible only after major political changes. This book will be of much interest to students of nuclear proliferation, arms control, security studies and International Relations.

When George Price died in January 1975, his funeral in London was attended by five homeless men. Alongside them were Bill Hamilton and John Maynard Smith, two distinguished British evolutionary biologists. All seven men had come to mourn an eccentric American genius who helped to unpick the riddle of how altruism, or unselfish concern for the welfare of others, could exist in a world driven by survival of the fittest and who committed suicide aged just 52. In The Price of Altruism Price's personal and professional journey is intricately woven into a sweeping arc of modern politics and science that takes us from Darwin's Beagle to the court of the Russian Tsar, from Marxist manifestos to Nazi heresies, and from First World War trenches to Vietnam demonstrations. Featuring some of the most brilliant minds of the modern age, it is the riveting tale of mankind's search for the origins of kindness.

Favourites, South Indian Dishes, North Indian Dishes and Sweets and Desserts to highlight the cooking methods and the blend of spices used in different regional Indian foods. The dishes featured are also from the more popular visitor destinations, so they would have a greater appeal.

Since the introduction of the personal computer, multi-media has become an important ingredient of modern life. Yet the combination of different media has a long history in western European culture: during the Middle Ages and early modern period, artists from various disciplines collaborated frequently and produced amazingly complex multi-media art works. The contributions to this volume in the series Groningen Studies in Cultural Change take up the challenge to go 'beyond comparatism' in order to study combinations of the arts in the most literal sense of the word and explore the changing attitudes towards the production and perception of multi-media art from the Middle Ages to the early modern period. The topics range from the epistemology of word and image combined, multi-media interior decoration, early forms of 'Totaltheater', political communication, the emotive effects of Lutheran poetry and music, to the eighteenth century French critics of 'ut pictura poesis'.
