Hi there! It's nice to present you once again with another 'hot' issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect

with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and “study

abroad” consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The

This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other courses in computerised accounting. Learning computerised book-keeping skills is very different from manual accounting. It can seem more like learning computer studies than book-keeping, and it is often difficult to connect it with what may have been previously learned in manual book-keeping. In this book Dr

Marshall resolves this problem with the same skill and insight that made his book on manual book-keeping, *Mastering Book-keeping*, so useful to readers over the years. Deliberately constructing a clear and continuous bridge between the methods so that the student never loses sight of the double entry concept, he presents the material in a way that makes computerised book-keeping clear and easy to understand.

level, awarding body and, where possible, the course code and content. The third section comprises a glossary of acronyms used, together with a comprehensive list of awarding bodies, industry lead bodies, professional institutes and associations, with their contact details. Section four is a directory of colleges offering vocational qualifications in the UK, arranged alphabetically by area. Finally, section five is an index of all qualifications, listed alphabetically by title.
