- A behind-the-scenes look at the cutting edge of psychedelic research.

- Provides a unique scientific explanation for the phenomenon of alien abduction experiences. From 1990 to 1995 Dr. Rick Strassman conducted U.S. Gove

research at the

most powerful  
psychedelics known.  
His detailed account  
of those sessions is an

riveting inquiry into  
the nature of the

human mind and the  
therapeutic potential  
of psychedelics.

DMT, a plant-  
derived chemical  
found in the

psychedelic Amazon  
brew, ayahuasca, is  
also manufactured  
by the human brain.

In Strassman's

volunteers, it consistently produced near-death and mystical experiences. Many reported convincing encounters with intelligent nonhuman presences, aliens, angels, and spirits. Nearly all felt that the sessions were among the most

profound experiences of their lives. Strassman's research connects DMT with the pineal gland, considered by Hindus to be the site of the seventh chakra and by Rene Descartes to be the seat of the soul.

naturally released by

the pineal gland,

facilitates the soul's  
movement in and out

integral part of the

as the highest states

even sexual  
transcendence.
