This book places Freud's theory of the reality principle in relation to both everyday experience and global issues of the 21st century and illustrates how it may be practically applied. Arguing against more critical recent accounts of Freud's science, the author seeks to show how one might apply the scientific method to everyday life. It demonstrates how Freud contributes to a better understanding of reason and how this in turn can be used to unravel the role of unreason in both politics and personal relationships. Including critical examinations of topics such as Narcissism, Victimhood and Empathy, this engaging reappraisal of Freud's relevance to contemporary life offers fresh insights for psychology, psychoanalysis and cultural theory; as well as practical guidance for a general reader.

Referring to a Chekhov story that advocates an active life, British-American writer, translator, and journalist based in St. Petersburg offers her perspective on the change from the Soviet Union to the Russian Republic, updated from visits and contacts to early 1997. Research over the past decade has helped to demystify hypnosis and meditation, bringing these practices into the scientific and clinical mainstream. Yet, while hypnosis and meditation overlap on many levels, few scientific accounts have explored their complementary rapprochement. Despite cultural and historical differences, hypnosis and meditation share common phenomenology, cognitive processes, and potential therapeutic merits. This book provides a synthesis of knowledge concerning the bridging of hypnosis and meditation. The authors adopt a trans-disciplinary approach considering cultural, historical, and philosophical perspectives to elucidate contemporary questions in cognitive, neurobiological, and clinical science. The book explores the relationship between hypnosis and meditation in five progressive sections: Part 1 investigates historical, cultural, and philosophical issues to contextualize the scientific study of contemplative practices. Part 2 presents a range of views concerning the similarities and differences between hypnosis and meditation. Part 3 explores the psychological and cognitive mechanisms at work. Part 4 integrates recent brain imaging findings to unravel the neural underpinnings. Finally, part 5 examines how juxtaposing hypnosis and meditation can enhance clinical applications. Hypnosis and Meditation is a valuable resource to both specialists as well as interested lay readers, and paves the road to a more unified science of how attention influences states of brain, body, and consciousness.

Author Richard Castillo, who studied under Arthur Kleinman of Harvard University, has developed a client-centered paradigm for mental illness based on recent biological, psychological, social, and cross-cultural studies. Culture & Mental Illness is written for a global audience. Although the book discusses American ethnic minorities, its scope includes a wide variety of cultural and ethnic groups from around the world.

Unplugging Popular Culture showcases youth and young adult characters from film and television who defy the stereotype of the "digital native" who acts as an unquestioning devotee to screened technologies like the smartphone. In this study, unplugged tools, or non-digital tools, do not necessitate a ban on technology or a refusal to acknowledge its affordances but work instead to highlight the ability of fictional characters to move from high tech settings to low tech ones. By repurposing everyday materials, characters model the process of reusing and upcycling existing materials in innovative ways. In studying examples such as Pitch Perfect, Supernatural, Stranger Things, and Get Out, the book aims to make theories surrounding materiality apparent within popular culture and to help today's readers reconsider stereotypes of the young people they encounter on a daily basis.

Meet Keiko. Keiko is 36 years old. She's never had a boyfriend, and she's been working in the same supermarket for eighteen years. Keiko's family wishes she'd get a proper job. Her friends wonder why she won't get married. But Keiko knows what makes her happy, and she's not going to let anyone come between her and her convenience store... 'Convenience Store Woman comes in three different guises. Since its inception, cinema has evolved into not merely a 'reflection' but an indispensable index of human experience - especially our experience of time's passage, of the present moment, and, most importantly perhaps, of the past, in both collective and individual terms. In this volume, Kilbourn provides a comparative theorization of the representation of memory in both mainstream Hollywood and production and reception. Focusing on European, North and South American, and Asian films, Kilbourn reads cinema as providing the viewer with not only the content and form of memory, but also with its own directions for use: the required codes and conventions for understanding and implementing this crucial prosthetic technology — an art of memory for the twentieth-century and beyond.

Ian Ward places contemporary political and jurisprudential responses to terrorism within a broader literary, cultural and historical context. Presents an analysis of the "nomadic" consciousness of our ancestors, and the forces -religious and political -that overwhelmed it during the Neolithic era, and considers its revival in the twentieth century. HE WILL TRAP YOU IN A WORLD OF TERROR The groundbreaking first novel in the bestselling Iona Linna thriller series. Perfect for fans of Jo Nesbo.

Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology, yet there has been little consensus about how to understand the relationship between landscape and art. This book brings together more than fifty scholars from these multiple disciplines to establish new ways of thinking about landscape in art.

This work is not only a general inquiry into ecstatic states of consciousness and an historical outline of the ecstatic poetic tradition but also an intensive study of five representative poets—Rumi, Wordsworth, Whitman, Dickinson, and Tagore. In a refreshingly original, wide-ranging engagement with concepts in psychology, religion, philosophy, aesthetics, sociology and history, this book demonstrates a theory of poetry that continues to influence writers in the current century.

Abraham Drassinower takes a fresh look at Freud, countering his prevalent image as a man pessimistically renouncing the possibility of social, political, and cultural change.

This book explores the life and ideas of the enigmatic twentieth century philosopher, mystic, and teacher of esoteric dances George Ivanovitch Gurdjieff, performing a hermeneutic textual analysis of all his writings to illuminate the place of hypnosis in his teaching. Foreword by J. Walter Driscoll.

This book describes and interprets trance behaviour among the Malagasy speakers of Mayotte. The author argues that trance can best be understood as a social activity rather than as a psychological problem or a means of manipulating others. This book should be of particular interest to those concerned with the study of ritual, symbols and non-Western religious systems.

Transpersonal Hypnosis presents a multidimensional, energy-based view of human awareness that integrates disparate biological, psychological, and spiritual therapeutic techniques. Each of the chapters - all from world-renowned contributors - includes both a historical overview and the theory behind the development of each technique. The authors emphasize experimental studies that examine the validity of using hypnotically accessed transpersonal states of consciousness to heal the body, mind, and spirit. Several clinical vignettes highlight the types of medical and psychological symptoms responsive to these approaches. The emerging field of spiritually-influenced treatments is transforming the practice of medicine.

After 1933, New York City gave shelter to many leading German and German-Jewish intellectuals. Stripped of their German citizenship by the Nazi-regime, these public figures either stayed in the New York area or moved on to California and other places. This compendium, adopting the title of a famous volume published by Klaus and Erika Mann in 1939, explores the impact the US, and NYC in particular, had on these authors as well as the influence they in turn exerted on US intellectual life. Moreover, it addresses the transformations that took place in the exiled intellectuals' thinking when it was translated into another language and addressed to an American audience. Among the individuals presented in this volume, are such prominent names as T.W. Adorno, H. Arendt, W. Benjamin, Bloch, B. Brecht, S. Kracauer, the Mann family, S. Morgenstern, and E. Panofsky. The authors of the essays in this compendium were free to choose the angle (biography, theory, politics) or aspect (a single work, a personal constellation) deemed best to illuminate the given intellectual's work. Acclaimed NYC photographer Fred Stein, a German-Jewish refugee from Dresden, produced numerous portraits of exiled intellectuals and artists. A selection of these compelling portraits is reproduced in this book for the first time.

This second volume explores Jung's understanding of synchronicity and argues that it offers an important contribution to contemporary science. Whilst the scientific world has often ignored Jung's theories as being too much like mysticism, Haule argues that what the human psyche knows beyond sensory perception is extremely valuable. Divided into two parts, areas of discussion include: synchronicity, mastery border zones of exact science meditation, parapsychology and psychokinesis Jung in the 21st Century Volume Two Synchronicity and Science will, like the first volume, be an invaluable resource for all those in the field of analytical psychology, including students of Jung, psychoanalysts and psychotherapists with an interest in the meeting of Jung and science.

This is the story of one of the most far-reaching human endeavors in history: the quest for mental well-being. From its origins in the eighteenth century to its wide scope in the early twenty-first, this search for emotional health and welfare has cost billions. In the name of mental health, millions around the world have been tranquilized, institutionalized, psycho-analyzed, sterilized, lobotomized or even euthanized. Yet at the dawn of the new millennium, reported rates of depression and anxiety are unprecedentedly high. Drawing on years of field research, Ian Dowbiggin argues that if the quest for emotional well-being has reached a crisis point in the twenty-first century, it is because mass society is enveloped by cultures of therapism and consumerism, which increasingly advocate bureaucratic and managerial approaches to health and welfare.

The beginning of the 21st century was a time of unprecedented events in American society: 9/11 and the wars that followed, partisan changes in government and the rapid advancements of the Internet and mass consumerism. In the two decades since, popular culture—particularly film—has manifested the underlying anxieties of the American psyche. This collection of new essays examines dozens of movies released 1998-2020 and how they drew upon and spoke to mass cultural fears. Contributors analyze examples across a range of genres—horror, teen rom-coms, military flicks, slow-burns, and animated children's films—covering topics including gender and sexuality, environmental politics, technophobia, xenophobia, and class and racial inequality.

The process of hypnosis is outlined in clear, plain English, in a series of brief learning modules that anyone can understand. Albert Dadas suffered from a strange compulsion that led him to travel obsessively, often without identification, not knowing who he was or why he traveled. Medical reports of Dadas set off at the time a small epidemic of compulsive mad voyagers, the epicenter of which was Bordeaux but which soon spread throughout France to Italy, Germany, and Russia. Today we are besieged by mental illnesses of the moment, such as chronic fatigue syndrome and attention deficit hyperactivity disorder. The debate rages about which of these conditions are affectations or cultural artifacts and which are "real." In Mad Travelers, Ian Hacking uses the Dadas case to weigh the legitimacy of cultural influences versus physical symptoms in the diagnosis of psychiatric disorders. He argues that psychological symptoms find stable homes at a given place and time, in "ecological niches" where transient illnesses flourish.

From one of the sharpest Christian voices of her generation and host of the podcast Relatable comes a framework for escaping our culture of trendy narcissism—and embracing God instead. We're told that the key to happiness is self-love. Instagram influencers, mommy bloggers, self-help gurus, and even Christian teachers promise that if we learn to love ourselves, we'll be successful, secure, and complete. But the promise doesn't deliver. Instead of feeling fulfilled, our pursuit of self-love traps us in an exhausting cycle: as we strive for self-acceptance, we become addicted to self-improvement. The truth is we can't find satisfaction inside ourselves because we are the problem. We struggle with feelings of inadequacy because we are inadequate. Alone, we are not good enough, smart enough, or beautiful enough. We're not enough—period. And that's okay, because God is. The answer to our insufficiency and insecurity isn't self-love, but God's love. In Jesus, we're offered a way out of our toxic culture of self-love and into a joyful life of relying on him for wisdom, satisfaction, and purpose. We don't have to wonder what it's all about anymore. This is it. This book isn't about battling your not-enoughness; it's about embracing it. Allie Beth Stuckey, a Christian, conservative new mom, found herself at the dead end of self-love, and she wants to help you combat the false teachings and self-destructive mindsets that got her there. In this book, she uncovers the myths popularized by our self-obsessed culture, reveals where they manifest in politics and the church, and dismantles them with biblical truth and practical wisdom.
