Fred And Ted Like To Fly (Beginner Books)

The yew is the oldest and most common tree in the world, but it is a plant of puzzling contradictions: it is a conifer with juicy scarlet berries, but no cones; deer can feast on its poisonous foliage, but it is lethal to farm animals; and it thrives where other plants cannot because of its extraordinarily low rate of photosynthesis. Exploring this paradoxical plant in Yew, Fred Hageneder surveys its position in religious and cultural history, its role in the creation

of the British Empire, and its place in modern medicine. Hageneder explains the way the yew is able to renew itself from the inside by producing interior roots and how early humans, fascinated with its regenerative powers, began to associate the tree with concepts of life and death, the afterlife, and eternity. As such, it can be found at the sacred sites of Native Americans, Buddhists, and Shinto shrines in Japan, and it has become a living symbol of the resurrection for the Christian faith. He describes how churchyards saved many yews during the Middle Ages, when the trees were used for the mass production of the longbow, which laid the foundation

for the British Empire. Finally, he discusses the latest scientific discoveries about the yew, including its use in cancer treatments. A comprehensive and richly illustrated history, *Yew* will appeal to botanists and other readers interested in the history and symbolism of the natural world.

The building of a vintage Indian Chief motorcycle is more than the restoration of a bike—it's the resurrection of a dream. Rebuilding the Indian chronicles one man's journey through the fearful expanse of midlife in a quest for peace, parts, and a happy second fatherhood. Fred Haefele was a writer who couldn't get his book published, an arborist

whose precarious livelihood might just kill him, and an expectant father for the first time in over twenty years. He was in a rut, until he purchased a box of parts not so euphemistically referred to as a "basket case" and tackled the restoration of an Indian Chief motorcycle. With limited mechanical skills, one foot in the money pit, and a colorful cast of local experts, Haefele takes us down the rocky road of restoration to the headlong, heart-thrilling rush of open highway on his gleaming midnight-blue Millennium Flyer.

Using examples from his work with Disney and as a senior-level hospital executive, author Fred Lee challenges the assumptions that have defined customer service in healthcare. In this unique book, he focuses on the similarities between Disney and hospitals--both provide an "experience," not just a service. It shows how hospitals can emulate the strategies that earn Disney the trust and loyalty of their guests and employees. The book explains why standard service excellence initiatives in healthcare have not led to high patient satisfaction and loyalty, and it provides 9 1/2 principles that will help

Sex. Religion. There is no denying that these two subjects are among the most provocative in American public life. Even the constitutional principle of church-state separation seems to give way when it comes to sex: the Supreme Court draws on theology

as readily as it draws on case law when rendering decisions that touch on sexuality. In this compelling and carefully argued study, Janet R. Jakobsen and Ann Pellegrini examine this powerful and disturbing connection as they explore the reasons why secular institutions habitually use religion to regulate sexual life. From state legislatures to the halls of Congress and the Supreme Court, from daily newspapers to popular magazines and television talk shows, Jakobsen and Pellegrini illustrate the intensity of America's obsession with sex in the name of values and the dangers it poses to some of our most basic freedoms. Using a wide range of case studies, Love the Sin offers an insightful critique of the ways in which sexuality in general and homosexuality in particular are discussed and debated in the public arena. Additionally, the book sets forth

constructive alternatives that highlight the vital links between sexual and religious freedom and expose the hazards of using religion as a justification for regulating sexuality. A timely, necessary, and refreshing contribution to the many debates surrounding religion, morality, and sex, Love the Sin boldly dreams an America that lives up to its promise of freedom and justice for all.

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive

choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of

balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

THE FRED & ROSE WEST TAPES' FRED & ROSE IS THE DEFINITIVE ACCOUNT OF THIS INFAMOUS CASE - NOW UPDATED WITH A POSTSCRIPT FROM THE AUTHOR Fred and Rose West are virtually unique in British criminal history: a husband and wife who loved and killed together. During their long relationship, the Wests murdered a series of young women, burying the remains of nine victims under their home at 25 Cromwell Street, Gloucester, including those of their daughter. What was left of Fred West's eight-year-old stepdaughter was dug up from under the Wests' previous Gloucester home; his first wife and nanny were buried in open country. Most victims had

been decapitated and dismembered, their remains showing signs of sexual torture. These twelve are just the ones police found when the Wests were arrested in 1994. There may be more whose bones have not been located . . . Howard Sounes broke the first major story about the Wests as a journalist, and covered the murder trial of Rosemary West, before writing Fred & Rose, the definitive account of this infamous case. Beginning with Fred's and Rose's bizarre childhoods, Sounes charts their lives and crimes in forensic detail, creating a fascinating and truly frightening account of a marriage soaked in blood.

A former Senior Partner and Global Managing Director at the

legendary design firm IDEO shows how to design conversations and meetings that are creative and impactful. Conversations are one of the most fundamental means of communicating we have as humans. At their best, conversations are unconstrained, authentic and open—two or more people sharing thoughts and ideas in a way that bridges our individual experiences, achieves a common goal. At their worst, they foster misunderstanding, frustration and obscure our real intentions. How often do you walk away from a conversation feeling really heard? That it moved the people in it forward in some important way? You're not alone. In his practice as a designer, Fred Dust began to approach conversations differently. After years of trying to broker communication between colleagues and clients, he came to believe there had to a way to design the art of conversation itself with intention and purpose, but still artful and

playful. Making Conversation codifies what he learned and outlines the four elements essential to successful exchanges: Commitment, Creative Listening, Clarity, and Context. Taken together, these four elements form a set of resources anyone can use to be more deliberate and purposeful in making conversations work.

From these humble beginnings he began his lifelong involvement with the game, first as a player, then coach and finally as an England selector. His incredible rise through the ranks of the cricketing establishment was even more remarkable given his background and the class divisions that once characterised British cricket. His career has been as eventful off the pitch as it has been on. When playing with Ted Dexter, Dexter once insisted he and Fred opened the innings in a Test match, so they could have the afternoon free to go racing at Cheltenham, and, after losing four toes in 1968, Titmus confounded all predictions by returning to first class cricket seven weeks later. Fred Titmus: A Life in Cricket is a remarkable testament to an extraordinary man.
