In the early 1990s, celebrated graphic designer Paula Scher (Make It Bigger, 2002) began painting maps of the world as she sees it. The larger her canvases grew, the more expressionistic her geographical visions became. Displaying a powerful command of image and type, Scher brilliantly transformed the surface area of our world. Paintings as tall as twelve feet depict continents, countries, and cities swirling in torrents of information and undulating with colorful layers of hand-painted boundary lines, place-names, and provocative cultural commentary. Collected here for the first time, Paula Scher MAPS presents thirty-nine of Scher's obsessively detailed, highly personal creations.

Nonstop Metropolis, the culminating volume in a trilogy of atlases, conveys innumerable unbound experiences of New York City through twenty-six imaginative maps and informative essays. Bringing together the insights of dozens of experts—from linguists to music historians, ethnographers, urbanists, and environmental journalists—amplified by cartographers, artists, and photographers, it explores all five boroughs of New York City and parts of nearby New Jersey. We are invited to travel through Manhattan's playgrounds, from polygot Queens to many-faceted Brooklyn, and from the resilient Bronx to the mystical kung fu hip-hop mecca of Staten Island. The contributors to this exquisitely designed and gorgeously illustrated volume celebrate New York City's unique vitality, its incubation of the avant-garde, and its literary history, but they also critique its racial and economic inequality, environmental impact, and erasure of its past. Nonstop Metropolis allows us to excavate New York's buried layers, to scrutinize its political heft, and to discover the unexpected in one of the most iconic cities in the world. It is both a challenge and homage to how New Yorkers think of their city, and how the world sees this capital of capitalism, culture, immigration, and more. Contributors: Sheerly Avni, Gaiutra Bahadur, Marshall Berman, Joe Boyd, Will Butler, Garnette Cadogan, Thomas J. Campanella, Daniel Aldana Cohen, Teju Cole, Joel Dinerstein, Paul La Farge, Francisco Goldman, Margot Jefferson, Lucy R. Lippard, Barry Lopez, Valeria Luiselli, Suketu Mehta, Emily Raboteau, Molly Roy, Sharifa Rhodes-Pitts, Luc Sante, Heather Smith, Jonathan Tarleton, Astra Taylor, Alexandra T. Vazquez, Christina Zafagna Interviews with: Valerie Capers, Peter Coyote, Grandmaster Caz, Grand Wizzard Theodore, Melle Mel, RZA

This handsome volume features 65 full-color maps charting Manhatta's development from the first Dutch settlement to the present. Each map is placed in context by an accompanying essay.

Winner, 2021 Glenda Laws Award given by the American Association of Geographers The first lesbian and queer historical geography of New York City Over the past few decades, rapid gentrification in New York City has led to the disappearance of many lesbian and queer spaces, displacing some of the most marginalized members of the LGBTQ+ community. In A Queer New York, Jen Jack Gieseking highlights the historic significance of these spaces, mapping the political, economic, and geographic dispossession of an important, thriving community that once called certain New York neighborhoods home. Focusing on well-known neighborhoods like Greenwich Village, Park Slope, Bedford-Stuyvesant, and Crown Heights, Giesecking shows how lesbian and queer neighborhoods have folded under the capitalist influence of white, wealthy gentrifiers who have ultimately failed to make room for them. Nevertheless, they highlight the ways lesbian and queer communities have succeeded in carving out spaces—and lives—in a city that has consistently pushed its most vulnerable citizens away. Beautifully written, A Queer New York is an eye-opening account of how lesbians and queers have survived in the face of twenty-first century gentrification and urban development.

Get to the heart of New York with this handy, pop-up map. This handy, pocket-sized city map includes 2 PopOut maps featuring a street map of downtown Manhattan and a street map of central Manhattan. "Published to coincide with an exhibition at the Museum of the City of New York celebrating the bicentennial of the 1811 Commissioners' Plan of Manhattan, this volume does more than memorialize such a visionary effort, it serves as an enduring reference full of rare images and information."—P, [4] of cover.

Beautifully designed and richly detailed, this collection of fifty individually drawn maps is a novel, visual way to unlock New York's special places. This unique new guide to New York dispenses with boring lists and dry descriptions and instead invites the user to discover different facets of the city through a series of fifty highly original, entertaining themed maps. Each of these inventive maps is illustrated in full color on subjects that range from the lighthearted (Famous Movie Locations) and whimsical (Where to Lose Your Children) to classic tourist itineraries (How to Find Manhattan Neighborhoods). The book includes something for everyone, from a map of the best spots to take a selfie to the landmarks of hip-hop. Some maps focus on the practical or exotic, while others reveal the city's forgotten or little-known corners. Taken together, the fifty maps create an extensive and exciting alternative to traditional guides. Contributing illustrators who were commissioned to create a map for this book include some well-known as well as up-and-coming illustrators: Jean Jullien, Gianpaolo Pagni, Chloé Poizat, Christian Roux, and Quentin Vijaux.

Find your way around the New York City subway! This book introduces the idea of graphic design as a way to solve problems and challenges, such as creating a map that can be understood by all New Yorkers and out-of-towners. Author and illustrator Emiliano Ponzi uses depictions of trains, subway stations, and the NYC skyline to create a love letter to the city. A groundbreaking work of information design, the subway map, designed by Massimo Vignelli, is an iconic work used by over a billion people every year. The Museum of Modern Art acquired the original 1972 diagram, along with the 1970 graphics standards manual Vignelli created for signage and station information, in 2004. The map is intimately tied to MoMA's history, as it was a MoMA curator, Mildred Constantine, who recommended that New York City's Metropolitan Transit Authority commission the map from the Italian designer. Armed with hundreds of blank maps she had painstakingly printed by hand, Becky Cooper walked Manhattan from end to end. Along her journey she met police officers, homeless people, fashion models, and senior citizens who had lived in Manhattan all their lives. She asked the strangers to “map their Manhattan” and to mail the personalized maps back to her. Soon, her P.O. box was filled with a cartography of intimate narratives: past loves, lost homes, childhood memories, comic moments, and surprising confessions. A beautifully illustrated, PostSecret-style tribute to New York, Mapping Manhattan includes 75 maps from both anonymous mapmakers and notable New Yorkers, including Man on Wire aerialist Philippe Petit, New York Times wine critic Eric Asimov, Tony award-winning actor Harvey Fierstein, and many more. Praise for Mapping Manhattan: “What an intriguing project.”—The New York Times “A tender cartographic love letter to this timeless city and multiple dimensions, parallel realities, and perpendicular views.” —Brain Pickings “Cooper’s beautiful project linking the lives of New Yorkers is one that will continue to grow.” —Publishers Weekly online

This powerful and lyrical debut novel is to Syria what The Kite Runner was to Afghanistan; the story of two girls living eight hundred years apart—a modern-day Syrian refugee seeking safety and an adventurous mapmaker’s apprentice—“perfectly aligns with the cultural moment” (The Providence Journal) and “shows how interconnected two supposedly opposing worlds can be” (The New York Times Book Review). This “beguiling” (Seattle Times) and stunning novel begins in the sum of 2011. Nour has just lost her father to cancer, and her mother moves Nour and her sisters from New York City back to Syria to be closer to their family. In order to keep her father’s spirit alive as she adjusts to her new home, Nour tells herself their favorite story—the tale of Rawiya, a twelfth-century girl who disguised herself as a boy in order to apprentice herself to a famous mapmaker. But the Syria Nour’s parents knew is changing, and it isn’t long before the war reaches Homs neighborhood. When a shell destroys Nour’s house and almost takes her life, she and her family are forced to choose: stay and risk more violence or flee across seven countries of the Middle East and North Africa in search of safety—along the very route Rawiya and her mapmaker took eight hundred years before in their quest to chart the world. As Nour’s family decides to take the risk, their journey becomes more and more dangerous, until they face a choice that could m family will be separated forever. Following alternating timelines and a pair of unforgettable heroines coming of age in perilous times, The Map of Salt and Stars is the “magical and heart-wrenching” (Christian Science Monitor) story of one girl telling herself the legend of another and learning that, if you listen to your own voice, some things can never be lost.

Like a modern-day Jane Jacobs, Janette Sadik-Khan transformed New York City's streets to make room for pedestrians, bikers, buses, and green spaces. Describing the battles she fought to enact change, Streetfight imparts wisdom and practical advice that other cities can follow to make their own streets safer and more vibrant. As New York City's transportation commissioner, Janette Sadik-Khan managed the seemingly impossible and transformed the streets of one of the world's greatest, toughest cities into dynamic spaces safe for pedestrians and bikers. Her approach was dramatic and effective: simply painting a part of the street to make it into a plaza or bus lane not only made the street safer, but it also lessened congestion and increased foot traffic, which improved the bottom line of businesses. Real-life experience confirmed that if you know how to read the street, you can make it function better by not totally reconstructing it but by reallocating that's already there. Breaking the street into its component parts, Streetfight demonstrates, with step-by-step visuals, how to rewrite the underlying "source code" of a street, with pointers on how to add protected bike paths, improve crosswalk space, and provide visual cues to reduce speeding. Achieving such a radical overhaul wasn't easy, and Streetfight pulls back the curtain on the battles Sadik-Khan won to make her approach work. She includes examples of how this new read the streets has already made its way around the world, from pocket parks in Mexico City and Los Angeles to more pedestrian-friendly streets in Auckland and Buenos Aires, and innovative bike-lane designs and plazas in Austin, Indianapolis, and San Francisco. Many are inspired by the changes taking place in New York City and are based on the same techniques. Streetfight deconstructs, reassembles, and reinvents the street, inviting readers to see it in ways they never imagin

Mapping Manhattan

From a rare map of yellow fever in eighteenth-century New York, to Charles Booth’s famous maps of poverty in nineteenth-century London, an Italian racial zoning map of early twentieth-century Asmara, to a map of wealth disparities in the banlieues of twenty-first-century Paris, Mapping Society traces the evolution of social cartography over the past two centuries. In this richly illustrated book, Laura Vaughan examines maps of ethnic or religious difference, poverty, and health inequalities, demonstrating how they not only serve as historical records of social enquiry, but also constitute inscriptions of social patterns that have been etched deeply on the surface of cities.

Mysteries and folkways of New York City revealed in an entertaining collection of graphic art The life and legend of New York City, from the size of its skyscrapers to the ways of its inhabitants, is vividly captured in this lively collection of more than 250 maps, cross sections, i=,owcharts, tables, board games, cartoons and infographics, and other unique diagrams spanning 150 years. Superstars such as Saul Steinberg, Maira Kalman, Christoph Niemann, Roz Chast, and Milton Glaser butt up against the unsung heroes of the popular press in a book that is made not only for lovers of New York but also for anyone who enjoys or works with information design.

Now available in paperback for the first time, this classic work presents a cognitive-semiotic framework for understanding how maps work as powerful, abstract, and synthetic spatial representations. Explored are the ways in which the many representational choices inherent in mapping interact with information processing and knowledge construction, and how the resulting insights can be used to make informed symbolization and design decisions. A new preface to the paperback edition situates the book within the context of contemporary technologies. As the nature of maps continues to evolve, Alan MacEachern emphasizes the ongoing need to think systematically about the ways people interact with and use spatial information.

Rick Steves Pocket guidebooks truly are a "tour guide in your pocket." This colorful, compact 220-page book includes Rick's advice for prioritizing your time, whether you're spending 1 or 7 days in a city. Everything a busy traveler needs is easy to access: a neighborhood overview, city walks and tours, sights, handy food and accommodations charts, and an appendix packed with information on trip planning and practicalities. Included in Rick Steves Pocket Paris: Sights: the Orangerie Museum, Rodin Museum, Cluny Museum, Army Museum, Napoleon's Tomb, Pompidou Center, Carnavalet Museum, and Picasso Museum Walks and Tours: the Historic Paris Walk, Louvre Tour, Orsay Museum Tour, Eiffel Tower Tour, Rue Cler Walk, Left Bank Walk, Champs-Elysees Walk, Marais Walk and Versailles Day Trip

On September 12, 1609, Henry Hudson first set foot on the land that would become Manhattan. Today, it's difficult to imagine what he saw, but for more than a decade, landscape ecologist Eric Sanderson has been working to do just that. Mannahatta: A Natural History of New York City is the astounding result of those efforts, reconstructing in words and images the wild island that millions now call home. By geographically matching an 18th-century map with one of the modern city, examining volumes of historic documents, and collecting and analyzing scientific data, Sanderson re-creates the forests of Times Square, the meadows of Harlem, and the wetlands of downtown. His lively text guides readers through this abundant landscape, while breathtaking illustrations transport them back in time. Mannahatta is a groundbreaking work that provides not only a window into the past, but also inspiration for the future.
