

Smart Kids Space: With More Than 30 Stickers

Offers an illustrated encyclopedia of general science, with informative and fun facts on a broad array of scientific topics.

Using the simple and fun activities, children can learn to write and count numbers again and again with this amazing wipe-clean activity book.

Text and illustrations provide information about the sun, moon, and planets that make up our solar system.

Baking, salt-packing, pickling, frying, stewing, roasting, grilling. These culinary techniques are used in countries around the world today, but they each originated out of the necessity of a certain region and its people to create meals for themselves. Readers will be so enthralled, they won't guess they're learning social studies as they journey across the world from kitchen to kitchen through the pages this book. Accessible text and foreign-yet-familiar photographs teach how different and the same we all are when it comes to preparing food.

When Finn and her dog Skeeter set out on a hike to cure their restless feet, they literally take a step into nature. A big gooey step...right into scat (also known as poop). And just like the animal it comes from, scat comes in all shapes and sizes. Scat, along with foot or paw tracks, can tell a lot about the creature who produced it. As Finn's hike takes her further into the woods, she happens along some scat and tracks from a variety of woodland creatures. Pairing punchy rhyme with science writing, Lisa Morlock has created the perfect nature guide, providing detailed descriptions of the prints, diets, and behaviors of the animals that Finn and Skeeter encounter along their hike. Watch your step!

Outer Space Activity and Coloring Book with Planets, Astronauts, Space Ships, Rockets (Children's Coloring Books, Kids Activities) - 55 Space Activities. Space activity and coloring book for boys, girls, and kids who love outer space! Featuring full-page drawings of planets, astronauts, spaceships, aliens, meteors, rockets, sun, moon, stars and more! Provides hours of fun and creativity. Inside you will find COLORING PAGES, MAZES, PUZZLES, COPY THE PICTURE, FIND DIFFERENCES, DOT TO DOT and COLORING BY NUMBER. Your little astronaut will be thrilled with this fun-packed Space Coloring and Activity Book for Kids! Printed single side for no bleed through. Large 8.5 x 11 pages. Perfect outer space coloring book for boys, girls, and kids of all ages. Makes a great space gift! BEST KIDS GIFT IDEA 2019 - SPECIAL LAUNCH PRICE (WHILE STOCKS LAST!!!!) Categories: space books, space books for kids, space coloring books, kids coloring books, space coloring books for boys, space coloring books for girls, toddler space coloring, space activity book, space coloring book for toddlers, robots coloring, kids activities, christmas gift, thanksgiving gift, x-mas gift, halloween gift

An exciting interactive title chock-full of stars, planets, aliens, and everything out of this world brings National Geographic Kids signature content to a sticker and activity book format. For kids who love our universe, this book features the coolest science kids can't get enough of: our planet Earth, cool asteroids, fun aliens, comets, and so much more. Packed with mazes, spelling and pattern games, drawing activities, and more, kids are sure to love these pages loaded with fun.

Discover the mysteries of science with Future Geniuses! Come along with Valentina, the astronaut, on this incredible journey to Mars and become a space genius! Up past the exosphere, thermosphere, and mesosphere, we will find outer space and learn the answers to some big questions. What is the ozone layer? What is gravity? Which countries have successfully traveled into space? What are the parts of rockets called, and what does each part do? What is space like? Future Geniuses is a collection that will help families spend a lot of time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subjects of space and space travel approachable and easy to understand for even the smallest scientists.

A fascinating look at planets, stars, space exploration and more. Search for alien worlds and life-forms with the Space Quest board game. Build a glow-in-the-dark planetarium. Warning: Choking Hazard - Small parts. Not intended for children under 3 yrs.

Help your child discover the wild, wonderful world we live in by introducing them to these fantastic factsKids love facts? and there's no better fact than a totally random and fascinating fact that changes your entire perspective of the world.Or maybe there is?What about a whole book jam-packed with over 1,000 facts? What about a book carefully curated by? wait for it? a dog?!There's no better mission, following his nose to collect the most amazing random facts in the entire world.The result? A unique family bonding experience, as much fun for the biggest members of the household as it is for the littlest.You could have a Harvard degree or a lifetime's experience as a librarian, and you still wouldn't have come across some of the facts found in Interesting Facts for Kids.But after a few things you'll ever learn about the world, you'll have a family of experts in? well... everything!If you're looking for new ways to spend a Sunday morning or a weeknight evening, look no further.If you've ever wanted to know how many eggs a hen lays per year, or how many drops of rain you'd need to fill a single teaspoon, now's your chance!Get ready for real family fun as you work through hilarious facts and wonder how much you really know about the world.

A large-format book from Roger Priddy, Smart Kids: Rainforest introduces children to the animals, flora, and fauna which inhabit our planet's rainforests. With amazing, close-up photographs, and accessible, easy-to-absorb fascinating facts about the plantlife and creatures featured.

Does the endless cosmic expanse known as space fascinate you? Earth, the planets, the stars, black holes and meteors? Throughout this book, you're going to learn all about space. About planets both near and far, and about our sun and the stars scattered across the universe. About the asteroids that fly around the Milky Way, and about the colossal events that have happened in our galaxies. About the discovery of 200 amazing facts about the cosmos we live in. You'll be able to surprise your friends and family with how much you know, and they'll watch in amazement as you tell them all about the incredible planets near us, about the stars in faraway galaxies, and the nebulae that contain them. That, and much, much more. await you.

Where am I in the solar system? A beloved bestseller, now refreshed with new art from Christine Gore, that will help children discover their place in the Milky Way. Where is the earth? Where is the sun? Where are the stars? Now with new art by Christine Gore, here is an out-of-this world introduction to the universe for children. With Earth as a starting point, a young astronaut leads readers through answering simple questions about our solar system. In clear language, drawings, and diagrams, space unfolds before a child's eyes. Colorful illustrations, filled with fun detail, give children a lot to look for on every page, and a glossary helps reinforce new words and concepts. A terrific teaching tool, Me and My Place in Space is an easy and enjoyable way to introduce the concept of space to budding astronomers. [Why Smart Kids Worry](#)

[with more than 30 stickers](#)

Exploring the planets of our solar system and much more, Smart Kids Space is an ideal first guide to the mysteries of our incredible universe. Perfect for helping children in elementary or first grade with school projects, it is packed with amazing photographs and accessible, informative text to help kids learn facts. With over 30 stickers just for fun, this paperback book is a must-have for kids who are interested in the wonders of space.

Why does my child seem to worry so much? Being the parent of a smart child is great—until your son or daughter starts asking whether global warming is real, if you are going to die, and what will happen if they don't get into college. Kids who are advanced intellectually often let their imaginations ruin wild and experience fears beyond their years. So what can you do to help? In Why Smart Kids Worry, Allison Edwards guides you through the mental and emotional process of where your child's fears come from and why they are so hard to move past. Edwards focuses on how to parent a child who is both smart and anxious and brings her years of experience as a therapist to give you the answers to questions such as: •How do smart kids think differently? •Should I let my child watch the nightly news on TV? •How do I answer questions about terrorists, hurricanes, and other scary subjects? Edwards's fifteen specially designed tools for helping smart kids manage their fears will help you and your child work together to help him or her to become more relaxed and worry-free.

On planet earth, what bird has larger eyes than its brain? Surprisingly enough, an ostrich has eyes that are larger than their own brain. If you like interesting and interactive trivia questions like this, then keep reading... We know trivia is fun, especially for kids, but we also know that learning new things and gaining new knowledge on topics you love is one of the most enjoyable parts about it. Trivia has been around since the dawn of time and continuously brings new and fun interactive ways for friends, family and children to enjoy together. Unfortunately, finding interesting topics to learn about can take a lot of time and effort to find when searching through blog post after blog post. Luckily, Trivia for Smart Kids puts an end to this problem, having all of the information you want to learn about and test your skills on in one, convenient place. In Trivia for Smart Kids, you can expect: To learn about the amazing health benefits of trivia questions 8 different categories of trivia to choose from 300+ different and mind-blowing questions Questions that are easy to hear and comprehend Multiple choice format Clear and concise narration for the ultimate trivia experience And much more... Now, we know some types of trivia questions can be repetitive and boring and seeing the same questions you always see over and over again is no fun. We've made it our #1 priority to find new, interesting and intriguing questions in order to keep you interested and always wanting more. So, are you ready to test your skills and see what you know about all different kinds of trivia? Then scroll up and click the "Add to Cart" button now!

Introduces the coral reefs in the oceans through descriptions and photographs, including creatures that live in reefs, locations of the world's coral reefs, and why the reefs are endangered.

This book includes a series of different questions on various topics, such as animal, science, astronomy, movies, history, maths, and much more. These carefully crafted questions are meant to create a fun, easy, and interesting learning process for children. Who was the first man to step foot in space? What can eat a lot of iron without getting sick? This and other questions have been put together to create the best and most fascinating questions for you, your kids, and the entire family. We know trivia is fun, especially for kids, but we also know that learning new things and gaining new knowledge on topics you love is one of the most enjoyable parts about it. Trivia has been around since the dawn of time and continuously brings new and fun interactive ways for friends, family and children to enjoy together. WINNER! Mom's Choice Gold Award for parenting books -- Mom's Choice Awards: The best in family-friendly media "My kid is smart, but..." It takes more than school smarts to create a fulfilling life. In fact, many bright children face special challenges: Some are driven by perfectionism; Some are afraid of effort, because they're used to instant success; Some routinely butt heads with authority figures; Some struggle to get along with their peers; Some are outwardly successful but just don't feel good about themselves. This practical and compassionate book explains the reasons behind these struggles and offers parents do-able strategies to help children cope with feelings, embrace learning, and build satisfying relationships. Drawing from research as well as the authors' clinical experience, it focuses on the essential skills children need to make the most of their abilities and become capable, confident, and caring people.

Discover the mystery of science with Future Geniuses! Little Doctor Valentina is back with a brand new adventure! This time, join Valentina as she explains the concept of genetics, using her adorable puppy, Mendel, as her model. With her handy microscope, Valentina examines Mendel's cells and teaches us all about cell parts—organelles, membranes, cytoplasm, and finally, the powerhouse of the cell, the nucleus. Within the nucleus, Valentina points out the DNA and the genes that explain everything about us—like why Mendel is yellow and his siblings are brown! Dive deep into the world of genetics and learn all about nitrogen bases, RNA, chromosomes, mitosis, and more.

Uncover what makes you, well, you! Future Geniuses is a collection that will help families spend a lot of time reading and learning together. Through simple text and fun illustrations, author and scientist Carlos Pazos makes the subject of genetics approachable and easy to understand for even the smallest scientists.

How to become a Junior Chess Master - CHESS FOR SMART KIDS Do you want to inspire your daughter or son for the most sophisticated game in human history? "In this book, readers are introduced to the Sun."--

In Solar Systems: Planets, Stars, and Orbits, students will explore all the parts that make up a solar system and be able to make observations about stars, planets, and orbital paths. Filled with fun facts, young learners will love exploring the scientific information and drawing conclusions about life now and in the future. The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe. Each 24-page book informs readers in grades K – 3 on the Sun, Earth, planets, and stars, while also igniting imaginations about the unknown. Stunning photographs and diagrams engage readers, while text-based questions aid in reading comprehension

Laugh along with this big-hearted collection of ridiculous stories and playful puns -- perfect for fans of Rob Elliott and Jon Scieska. A collection of twenty outrageously funny short stories for younger middle grade readers, Really Stupid Stories for Really Smart Kids is full of puns, "bad" jokes, and tall tales that will have you rolling on the floor with laughter. From "snowpeople" falling from the sky to a boy who only communicates through singing, there's a story for every fan of Alan Katz's signature humor.

There are 26 amazing animals to discover in this large format, fact-packed A – Z. On every page, there is a new animal to find out about, each corresponding to a letter of the alphabet. Kids will love to find out where they come from, what they eat, how big they are and much, much more. Illustrated with big, bold photographs, this is a surefire hit for animal-loving kids.

Underwater earthquakes, volcanoes, and mudslides can cause tsunami waves that reach land and wreak havoc. Children will learn how tsunamis develop, how they are detected, and their devastating impact on communities.
