

The Professor In The Cage: Why Men Fight And Why We Like To Watch

Little children ought to learn all the teachings Jesus taught about in the Bible. 1/6th of everything Jesus taught about was on judgment and hell. That is a huge amount of teaching on the subject! But how do we teach our children such a hard biblical idea appropriately? In this tastefully illustrated work that is completely in rhyme, the Bible's teaching about hell is outlined in a very easy to understand manner. It is aimed at children 5 to 9 years old, but can certainly be read by any age. It concerns a young boy who we find is trapped in a cage called "Big Sin" and can't escape on his own. The cage is suspended by a chain that is rusting and could break at any moment. What will our young friend do? What is he thinking about as he stands there locked away? He sees others in cages as well, some who don't escape, and some who jump to safety as their prisons doors are opened by a mysterious key. Will our young friend get out? How will he escape THE CAGE?

*An English professor begins training in the sport of mixed martial arts and explores the science and history behind the violence of men. When a mixed martial arts (MMA) gym moves in across the street from his office, Jonathan Gottschall sees a challenge, and an opportunity. Pushing forty, out of shape, and disenchanted with his job as an adjunct English professor, part of him yearns to cross the street and join up. The other part is terrified. Gottschall eventually works up his nerve, and starts training for a real cage fight. He's fighting not only as a personal test but also to answer questions that have intrigued him for years: Why do men fight? And why do so many seemingly decent people like to watch? In *The Professor in the Cage*, Gottschall's unlikely journey from the college classroom to the fighting cage drives an important new investigation into the science and history of violence. Mixed martial arts is a full-contact hybrid sport in which fighters punch, choke, and kick each other into submission. MMA requires intense strength, endurance, and skill; the*

fights are bloody, brutal, and dangerous. Yet throughout the last decade, cage fighting has evolved from a small-time fringe spectacle banned in many states to the fastest-growing spectator sport in America. But the surging popularity of MMA, far from being new, is just one more example of our species' insatiable interest not just in violence but in the rituals that keep violence contained. From duels to football to the roughhousing of children, humans are masters of what Gottschall calls the monkey dance: a dizzying variety of rule-bound contests that establish hierarchies while minimizing risk and social disorder. In short, Gottschall entered the cage to learn about the violence in men, but learned instead how men keep violence in check. Gottschall endures extremes of pain, occasional humiliation, and the incredulity of his wife to take us into the heart of fighting culture—culminating, after almost two years of grueling training, in his own cage fight. Gottschall's unsparing personal journey crystallizes in his epiphany, and ours, that taming male violence through ritualized combat has been a hidden key to the success of the human race. Without the restraining codes of the monkey dance, the world would be a much more chaotic and dangerous place.

This major study of the father of modern sociology explores the intimate relationship between the events of Max Weber's personal history and the development of his thought. When it was first

published in 1970, Paul Roazen described "The Iron Cage "as "an example of the history of ideas at its very best"; while Robert A. Nisbet said that "we learn more about Weber's life in this volume than from any other in the English language." Weber's life and work developed in reaction to the rigidities of familial and social structures in Imperial Germany. In his youth he was torn by irreconcilable tensions between the Bismarckian authoritarianism of his father and the ethical puritanism of his mother. These tensions led to a psychic crisis when, in his thirties, he expelled his father (who died soon thereafter) from his house. His reaction to the collapse of the European social order before and during World War I was no less personal and profound. It is the triumph of Professor Mitzman's approach that he convincingly demonstrates how the internalizing of these severe experiences led to Weber's pessimistic vision of the future as an "iron cage" and to such seminal ideas as the notion of charisma and the concept of the Protestant ethic and its connection with the spirit of capitalism. The author's thesis also serves as a vehicle for describing the social, political, and personal plight of the European bourgeois intellectual of Weber's generation. In synthesizing Weber's life and thought, Arthur Mitzman has expanded and refined our understanding of this central twentieth-century figure. As Lewis Coser writes in the preface, until now

"there has been little attempt to bring together the work and the man, to show the ways in which Weber's cognitive intentions, his choice of problems, were linked with the details of his personal biography. Arthur Mitzman fills this gap brilliantly."

David Foster Wallace's Infinite Jest raised expectations of what a novel might do. As he understood fiction to aim at what it means to be human, so he hoped his work might relieve the loneliness of human suffering. In that light, The Fact of the Cage shows how Wallace's masterpiece dramatizes the condition of encagement and how it comes to be met by "Abiding" and through inter-relational acts of speaking and hearing, touching, and facing. Revealing Wallace's theology of a "boneless Christ," The Fact of the Cage wagers that reading such a novel as Infinite Jest makes available to readers the redemption glimpsed in its pages, that reading fiction has ethical and religious significance—in short, that reading Infinite Jest makes one better. As such, Plank's work takes steps to defend the ethics of fiction, the vital relation between religion and literature, and why one just might read at all.

In The Glass Cage, Pulitzer Prize nominee and bestselling author Nicholas Carr shows how the most important decisions of our lives are now being made by machines and the radical effect this is having on our ability to learn and solve problems. In May 2009 an Airbus A330 passenger jet equipped with the latest 'glass cockpit' controls plummeted 30,000 feet into the Atlantic. The reason for the crash: the autopilot had routinely switched itself off. In fact, automation

is everywhere – from the thermostat in our homes and the GPS in our phones to the algorithms of High Frequency Trading and self-driving cars. We now use it to diagnose patients, educate children, evaluate criminal evidence and fight wars. But psychological studies show that we perform best when fully involved in a task, while the principle of automation – that humans are inefficient – is self-fulfilling. The glass cockpit is becoming a glass cage. In this utterly engrossing exposé, bestselling writer Nicholas Carr reveals how automation is affecting our ability to solve problems, forge memories and acquire skills. Rather than rejecting technology, Carr argues that we must urgently rethink its role in our lives, using it to enhance rather than diminish the extraordinary abilities that make us human.

*At a time when a lasting peace between the Palestinians and the Israelis seems virtually unattainable, understanding the roots of their conflict is an essential step in restoring hope to the region. In *The Iron Cage*, Rashid Khalidi, one of the most respected historians and political observers of the Middle East, homes in on Palestinian politics and history. By drawing on a wealth of experience and scholarship, Khalidi provides a lucid context for the realities on the ground today, a context that has been, until now, notably lacking in our discourse. The story of the Palestinian search to establish a state begins in the mandate period immediately following the breakup of the Ottoman Empire, the era of British control, when fledgling Arab states were established by the colonial powers with assurances of eventual independence. Mandatory Palestine was a place of real promise, with unusually high literacy rates and a relatively advanced economy. But the British had already begun to construct an iron cage to hem in the Palestinians, and the Palestinian leadership made a series of errors that would eventually prove crippling to their dream of independence. The Palestinians' struggle intensified in the stretch before and after World War II, when colonial control of the region became increasingly unpopular, population shifts began with heavy Jewish immigration from Eastern Europe, and power began to devolve to the United States. In this crucial period, Palestinian leaders continued to run up*

against the walls of the ever-constricting iron cage. They proved unable to achieve their long-cherished goal of establishing an independent state—a critical failure that set a course for the decades that followed, right through the eras of the Palestinian Liberation Organization, the Palestinian Authority, and Hamas. Rashid Khalidi's engrossing narrative of this torturous history offers much-needed perspective for anyone concerned about peace in the Middle East.

"The Cage is a tightly written and clear-eyed narrative about one of the most disturbing human dramas of recent years. . . . A riveting, cautionary tale about the consequences of unchecked political power in a country at war. A must-read."

—Jon Lee Anderson, New Yorker staff writer and author of The Fall of Baghdad In the closing days of the thirty-year Sri Lankan civil war, tens of thousands of civilians were killed, according to United Nations estimates, as government forces hemmed in the last remaining Tamil Tiger rebels on a tiny sand spit, dubbed "The Cage." Gordon Weiss, a journalist and UN spokesperson in Sri Lanka during the final years of the war, pulls back the curtain of government misinformation to tell the full story for the first time. Tracing the role of foreign influence as it converged with a history of radical Buddhism and ethnic conflict, The Cage is a harrowing portrait of an island paradise torn apart by war and the root causes and catastrophic consequences of a revolutionary uprising caught in the crossfire of international power jockeying. Gordon Weiss has lived in New York and worked in numerous conflict and natural disaster zones including the Congo, Uganda, Darfur, Bosnia, Afghanistan, Syria, and Haiti. The Rounds are humans with the sex organs of both genders. Artificially created to test the limits of the human body in space, they are now a minority, despised and hunted by the terrorist group Vessel of Life. Aboard Jupiter-I, a space station orbiting the gas giant that shares its name, the Rounds have created their own society with a radically different view of gender and of life itself. Security chief Shirosaki keeps the peace between the Rounds and the typically gendered "Monaurals," but when a terrorist strike hits the station, the balance of power and tolerance is at risk...and an entire people is targeted for genocide. -- VIZ Media

Most people spend their lives trying to escape some kind of cage. Rollie Peterkin left behind conventional success and stepped into one. When his college wrestling career ended in heartbreak, Rollie fell short of his dream of standing on the national podium. After graduating with an Ivy League degree, he tried to take solace in the lucrative Wall Street job offer that awaited him. He vigorously launched himself into his new career as a bond trader and grew accustomed to fancy dinners, expense accounts, late nights, and early mornings. Rollie was achieving all of his goals, but began to feel like something was missing. During a trip to Peru, a chance encounter with a legendary cage fighter would inspire him to question the well-worn path to success he had always known. Soon after, Rollie plotted his escape and ultimately left behind the life of luxury to pursue a savage dream. Along the way he faced life changing obstacles that he never could have

Literary studies are at a tipping point. ." There is broad agreement that the discipline is in "crisis" - that it is aimless, that its intellectual energy is spent, that all of the trends are bad, and that fundamental change will be required to set things right. But there is little agreement on what those changes should be, and no one can predict which way things will ultimately tip. Literature, Science, and a New Humanities represents a bold new response to the crisis in academic literary studies. This book presents a total challenge to dominant paradigms of literary analysis and offers a sweeping critique of those paradigms, and sketches outlines of a new paradigm inspired by scientific theories, methods, and attitudes.

Within a context rarely imagined, Richard Souza writes of sex and love through a constellation of memories, from his first sexual experience at age five to his mother's last years. You will see how, in his youth, he choreographed life experiences-ones that made up the journey into his own heart, who he was, and who he became in spite of environment, circumstance, and fear. The raw, sensitive examination of sexual abuse that was embraced as an awakening makes *A Cage Full of Monkeys* a coming-of-age story like no other. Souza has managed to write a memoir that reads like a novel... The town comes alive, as do the characters and his compelling struggle to harness memory to connect intimately with the journey of his heart. -Karen Randall, English Studies Chair for the Schools of the Sacred Heart, San Francisco (Retired), recipient of the Herbst

First performed at the midpoint of the twentieth century, John Cage's 4'33", a composition conceived of without a single musical note, is among the most celebrated and ballyhooed cultural gestures in the history of modern music. A meditation on the act of listening and the nature of performance, Cage's controversial piece became the iconic statement of the meaning of silence in art and is a landmark work of American music. In this book, Kyle Gann, one of the nation's leading music critics, explains 4'33" as a unique moment in American culture and musical composition. Finding resemblances and resonances of 4'33" in artworks as wide-ranging as the paintings of the Hudson River School and the music of John

Lennon and Yoko Ono, he provides much-needed cultural context for this fundamentally challenging and often misunderstood piece. Gann also explores Cage's craft, describing in illuminating detail the musical, philosophical, and even environmental influences that informed this groundbreaking piece of music. Having performed 4'33" himself and as a composer in his own right, Gann offers the reader both an expert's analysis and a highly personal interpretation of Cage's most divisive work.

This book uses a sociological and ethnographic lens to explore why MMA participants endure grueling workouts and serious injury. The authors argue that the idolization of MMA participants from their supporters, each other, and culture more generally is linked to the creation of a type of publicly accessible and consumable form of masculinity.

John Cage: Composed in America is the first book-length work to address the "other" John Cage, a revisionist treatment of the way Cage himself has composed and been "composed" in America. Cage, as these original essays testify, is a contradictory figure. A disciple of Duchamp and Schoenberg, Satie and Joyce, he created

compositions that undercut some of these artists' central principles and then attributed his own compositional theories to their "tradition." An American in the Emerson-Thoreau mold, he paradoxically won his biggest audience in Europe. A freewheeling, Californian artist, Cage was committed to a severe work ethic and a firm discipline, especially the discipline of Zen Buddhism.

"The book is a comprehensive examination of John Cage's seminal Concert for Piano and Orchestra. It places the piece into its many contexts, examining its relationship with Cage's compositional practice of indeterminacy more generally, the importance of Cage's teacher, Arnold Schoenberg, on the development of his structural thought, and the impact of Cage's (mis)understanding of jazz. It discusses, on the basis of Cage's sketches and manuscripts, the compositional process at play in the piece. It details the circumstances of the piece's early performances-often described as catastrophes-its recording and promotion, and the part it played in Cage's (successful) hunt for a publisher. It examines in detail the various ways in which Cage's pianist of choice, David Tudor, approached the piece, differing according to whether it was to be performed with an orchestra, alongside Cage delivering the lecture,

'Indeterminacy', or as a piano solo to accompany Merce Cunningham's choreography Antic Meet. It demonstrates the ways in which, despite indeterminacy, the instrumental parts of the piece are amenable to analytical interpretation, especially through a method which exposes the way in which those parts form a sort of network of statistical commonality and difference, analysing, too, the pianist's part, the Solo for Piano, on a similar basis, discussing throughout the practical consequences of Cage's notations for a performer. It shows the way in which the piece played a central role, first, in the construction of who Cage was and what sort of composer he was within the new musical world but, second, how it came to be an important example for professional philosophers in discussing what the limits of the musical work are"--

A leading historian reveals the never-before-told story of a doomed British prison and the massacre of its American prisoners of war After the War of 1812, more than five thousand American sailors were marooned in Dartmoor Prison on a barren English plain; the conflict was over but they had been left to rot by their government. Although they shared a common nationality, the men were divided by race: nearly a thousand were Black, and at the behest of the

white prisoners, Dartmoor became the first racially segregated prison in US history. The Hated Cage documents the extraordinary but separate communities these men built within the prison—and the terrible massacre of nine Americans by prison guards that destroyed these worlds. As white people in the United States debated whether they could live alongside African Americans in freedom, could Dartmoor’s Black and white Americans band together in captivity? Drawing on extensive new material, The Hated Cage is a gripping account of this forgotten history.

Through the Looking Glass examines John Cage's interactions and collaborations with avant-garde and experimental filmmakers, and in turn seeks out the implications of the audiovisual experience for the overall aesthetic surrounding Cage's career. As the commercially dominant media form in the twentieth century, cinema transformed the way listeners were introduced to and consumed music. Cage's quest to redefine music, intentionality, and expression reflect the similar transformation of music within the larger audiovisual experience of sound film. This volume examines key moments in Cage's career where cinema either

informed or transformed his position on the nature of sound, music, expression, and the ontology of the musical artwork. The examples point to moments of rupture within Cage's own consideration of the musical artwork, pointing to newfound collision points that have a significant and heretofore unacknowledged role in Cage's notions of the audiovisual experience and the medium-specific ontology of a work of art.
