

The Pursuit Of The Soul

This book examines historical notions of self, psyche and soul and relates them to the investigations of theologians and psychologists in a contemporary setting. One of the most striking features of contemporary psychology is the return of language of the 'soul' in contemporary discourse. In this original analysis Dr Peter Tyler investigates the origins and use of 'soul-language' in the Christian tradition before turning his attention to the evolution and preoccupations of

modern psychoanalysis. In his forensic examination he explores the dynamics of psychoanalysis as a 'tool to rediscover the soul' of the 21st century seeker. Central to his book is the perceived clash between analysis and the spiritual tradition. His uncompromising conclusion is that the dialogue of the two in our present time will have far-reaching repercussions for church, society and future human well-being. classic This Tremendous Lover offers the hope of a deeper union with God through a life of charity, humility, and abandonment to the divine will. Salvation is from our side a choice, from the divine side [...] a conquest of the Most High God. - A. W. Tozer With words like these, Tozer shakes the soul. He crumbles the lies we believe and calls us to the more sure way. In these pages, Tozer says what it means to truly be saved. It is not merely to assent to Jesus and go on our same old way, but to be conquered by the Almighty God and invaded by His Spirit. A saved person is a

In the post-Freudian age confession of any kind has had a bad press but is now coming back into popularity as guilt and sin become helpful concepts. Peter Tyler, an author and practicing psychotherapist, argues that rather than being something to consign to the rubbish heap of history, confession offers unexplored potential for the healing of the postmodern soul. The book addresses all those engaged in psychotherapeutic and healing

The book aims to reignite the sense of wonder that permeated this remarkable era, as rulers and ruled navigated overwhelming cultural, political and technological changes. It was a time where what was seen as modern with amazing speed appeared old-fashioned, where huge cities sprang up in a

In the period bounded by the Battle of Waterloo and the outbreak of World War I, Europe dominated the rest of the world as never before or since: this book breaks new ground by showing how the continent shaped, and was shaped by, its interactions with other parts of the globe. Richard Evans explores fully the revolutions, empire-building and wars

American racism by looking for intimacy, happiness, and a connection to their racial identities. Through their encounters with Jamaican online communities and their participation in trips organized by Girlfriend Tours International, the women construct notions of racial, sexual, and emotional belonging by forming relationships with Jamaican men and other "girlfriends." These relationships allow the women to exercise agency and find happiness in ways that resist the damaging

intersections of racism and patriarchy in the United States. However, while the women require a spiritual and virtual connection to Jamaica in order to live happily in the United States, their notion of happiness relies on travel, which requires leveraging their national privilege as American citizens. Ibn Miskawayh, the Soul, and the Pursuit of Happiness explores the moral philosophy and context of Ibn Miskawayh

(932-1030), an advocate of the intellectually cultivated life with a strong religious bent. Though not necessarily a major innovator, he sought through his writings to provide a moral compass for turbulent times, much like thinkers such as Petrarch (1304-1374), Pico della Mirandola (1463-1494), Francois Rabelais (1494-1553), Montesquieu (1689-1755) or more recently, Mortimer Adler (1902-2001). Despite the tumultuous times in which they lived, these thinkers offered the world hope through a humanism that cultivated both civic and moral character. Whether directly expressed in

his moral philosophy or illustrated in the examples of renowned or notorious historical figures, Miskawayh's core idea is that one's character is much easier kept than recovered. In this book, John Peter Radez shows how Miskawayh stands out not only as one of Islam's first ethicists, but also one of its true intellectuals: thinker, historian, codifier of the science of adab, and a truly happy sage who represented the best of his generation's intellectual and cultural elite. Miskawayh's message of how to create lives worthy of human beings—his civic humanism—resonates

Contains the essence of the logotherapeutic writings of Viktor Frankl, who noted that many readers report that they understand some parts of logotherapy for the first time after reading this book. Fabry wrote in the introduction: Many older therapies place responsibility for our difficulties on our early upbringing. Logotherapy is "education to responsibility." Outside influences are important but not all-determining. Within limitations we have a say about who we are and who we want to become. We need never let ourselves be reduced

to helpless victims. Consequently, logotherapy-unlike therapies that aim at equilibrium by adjusting patients to society-does not see a tensionless life as a therapeutic goal. Tension is part of living as a human being in a human society. To remain healthy, the unhealthy tensions of body and psyche are to be avoided. But the healthy tension of the spirit strengthens our spiritual muscles. The healthiest tension is between what we are and what we have the vision of growing toward, or, to use Frankl's favorite phrase, "the tension between being and

meaning" (Psychotherapy and Existentialism, p. 10). The struggle for meaning is not easy. Life does not owe us pleasure; it does offer us meaning. Mental health does not come to those who demand happiness but to those who find meanings; to them happiness comes as a side product. "It must ensue" noted Frankl. "It cannot be pursued" (Unconscious God, p. 85). Logotherapy maintains and restores mental health by providing a sound view of the human being and the world as we know it. It draws on the huge reservoir of health stored in our specifically human

dimension-our creativity, our capacity to love, our reaching out to others, our desire to be useful, our ability to orient to goals, and our will to meaning.

Logophilosophy emphasizes what is right with us, what we like about ourselves, our accomplishments, and our peak experiences. It also considers the qualities we dislike so we may change them, our failures so we can learn from them, our abysses so we may lift ourselves up, knowing that peaks exist and can be reached.

Explores the nature and role of wisdom in education. Modern scholarship has struggled to come to terms with the meaning of wisdom and its significance in the field of education. This book examines the

importance of pursuing wisdom in schools by turning to ancient and medieval sources for clarification concerning the nature of wisdom. Sean Steel argues that our current emphasis on the development of rigorous critical-analytic thinking skills, on assessment, and on accountability in education has negatively impacted the ability of schools to foster an environment in which both students and teachers might pursue

wisdom. Although in recent times efforts have been made to incorporate the pursuit of wisdom into schools through Philosophy for Children (P4C) and contemplative education programming, such initiatives have missed their mark. Steel therefore recommends not more accountability in education for the purpose of ensuring global competitiveness, but rather the institutional promotion of periods of leisure or schole in the school day.
