

## A Moment Of Clarity

**The Practical Guide to Building a Career in the Digital Age** If Marc Miller could have seen the future when he wrote his first book: **Repurpose Your Career, A Practical Guide for Baby Boomers**, he might have called it **Life As You Know It Is About to Change...A Lot**. Since the 2008 economic downturn left many Baby Boomers unable to retire, Marc decided to use his own experiences to help others pivot to a career that would fulfill them for the next 20 years. In his second book, **Repurpose Your Career: A Practical Guide for the Second Half of Life** he addressed the fact that the people seeking him out weren't all Baby Boomers. Many in Generation X were also either dissatisfied with their careers or were being displaced by ongoing technological and social disruption. **Repurpose Your Career** third edition responds to another huge shift in work: In this age of disruption, digitization, and the gig economy, people need a new mindset and strategies to become continual learners, create their own flexible careers, and cope with ageism. This book helps them do it. Miller's **Career Pivot.com** has been listed as a top career site by organizations including Forbes and Career Sherpa, and his strategies for a career transition have been featured on Mashable, Life Hacker, Money, Flexjobs and Sixty & Me. His second book was listed as one of the best career books of all time by Book Authority. A "recovering engineer," who spent years working at IBM, Miller's own career journey started when his bicycle collided with a car, nearly ending his life. The experience changed his perspective on what he was doing with his time and launched him on a search for career fulfillment, leading him to jobs including teaching in the inner city, fundraising for a non-profit, and working for startups. He decided to parlay his experiences-and his engineer's expertise at breaking big tasks into manageable steps-into helping others find long-lasting career fulfillment. Today, though unemployment is at record lows for all age groups, employee satisfaction numbers have remained low. Everyone wants a job that's meaningful and fulfilling to them as individuals, but few know how to evaluate an opportunity for those criteria. Instead, they focus on things like money and location, not realizing that more impactful factors to their happiness might include how much time they interact with others, whether the role requires multitasking or single focus, and what level of emotional support they need. Complicating matters is the fact that entire industries can virtually disappear overnight and that many people will wind up doing a series of jobs and side gigs rather than having one long-term role with a single employer. Every worker-regardless of age--needs to avail themselves of every opportunity to learn and grow rather than expecting someone to train them. And they to look not for a role to fill but a problem to solve. Written with professional writer Susan Lahey, **Repurpose Your Career**, the third edition is not only an easy read but packed with practical information and specific action steps. It's the guidebook people in their 40 and beyond need to carry them into the next phase of life.

In a small town, in the smallest county in the Florida panhandle, a twenty-five-year-old cold case murder is re-

opened. A new female police officer visits a seniors' residence to find out that the prime witness in the case, Jacob Jeebs, was officially diagnosed with Alzheimer's last year but is still in the early stages. Both the judge and the sheriff are locals and have been in their jobs for over thirty years and remember the initial investigation very well. In fact, the two of them along with Jacob Jeebs have been fishing together every Sunday morning for almost three decades. This new information might lead to a conviction of the main suspect from twenty-five years ago. But what would the legal ramifications be? An Alzheimer's patient has never testified at a trial of any kind before. How can you put him on the witness stand? How can you not? He is the only one who knows the truth. Will the defense be able to tear his testimony apart or will the prosecution defend the validity of using a witness who can't recall what he had for breakfast this morning, but can remember an event that happened years ago in astonishing detail? 'A Moment of Clarity', a ground-breaking legal drama that answers those questions in a compelling, creative way.

**THESE HABITS WILL MAKE YOU EXTRAORDINARY.** Twenty years ago, author Brendon Burchard became obsessed with answering three questions: 1. Why do some individuals and teams succeed more quickly than others and sustain that success over the long term? 2. Of those who pull it off, why are some miserable and others consistently happy on their journey? 3. What motivates people to reach for higher levels of success in the first place, and what practices help them improve the most? After extensive original research and a decade as the world's leading high performance coach, Burchard found the answers. It turns out that just six deliberate habits give you the edge. Anyone can practice these habits and, when they do, extraordinary things happen in their lives, relationships, and careers. Which habits can help you achieve long-term success and vibrant well-being no matter your age, career, strengths, or personality? To become a high performer, you must seek clarity, generate energy, raise necessity, increase productivity, develop influence, and demonstrate courage. This book is about the art and science of how to cultivate and practice these proven habits. Whether you want to get more done, lead others better, develop skill faster, or dramatically increase your sense of joy and confidence, the habits in this book will help you achieve it. Each of the six habits is illustrated by powerful vignettes, cutting-edge science, thought-provoking exercises, and real-world daily practices you can implement right now. If you've ever wanted a science-backed, heart-centered plan to living a better quality of life, it's in your hands. Best of all, you can measure your progress. A link to a free professional assessment is included in the book.

A classic novel that deserves a place on every bookshelf and is not to be missed by fans of Woolf's seminal work. Adeline Virginia Woolf (1882-1941) was an English writer. She is widely hailed as being among the most influential modernist authors of the 20th century and a pioneer of stream of consciousness narration. Woolf suffered numerous nervous breakdowns during her life primarily as a result of the deaths of family members, and it is now believed that she may have suffered from bipolar disorder. In 1941, Woolf drowned herself in the River Ouse at Lewes, aged 59. Other notable works by this author include: "Pattledom" (1925), "A Room of One's Own" (1929), "The Captain's Death Bed: and Other Essays" (1950). Read & Co. A FINANCIAL TIMES BUSINESS BOOK OF THE MONTH (APRIL 2017) Humans have become subservient to algorithms. Every day brings a new Moneyball fix - a maths whiz who will crack open an industry with clean fact-based analysis rather than human intuition and experience. As a result, we have stopped thinking. Machines do it for us. Christian Madsbjerg argues that our fixation with data often masks stunning deficiencies, and the risks for humankind are enormous. Blind devotion to number crunching imperils our businesses, our educations, our governments, and our life savings. Too many companies have lost touch with the humanity of their customers, while marginalising workers with arts-based skills.

Contrary to popular thinking, Madsbjerg shows how many of today's biggest success stories stem not from 'quant' thinking but from deep, nuanced engagement with culture, language, and history. He calls his method sensemaking. In this landmark book, Madsbjerg lays out five principles for how business leaders, entrepreneurs, and individuals can use it to solve their thorniest problems. He profiles companies using sensemaking to connect with new customers, and takes readers inside the work process of sensemaking 'connoisseurs' like investor George Soros, architect Bjarke Ingels, and others. Both practical and philosophical, Sensemaking is a powerful rejoinder to corporate groupthink and an indispensable resource for leaders and innovators who want to stand out from the pack.

*Businesses need a new type of problem solving. Why? Because they are getting people wrong. Traditional problem-solving methods taught in business schools serve us well for some of the everyday challenges of business, but they tend to be ineffective with problems involving a high degree of uncertainty. Why? Because, more often than not, these tools are based on a flawed model of human behavior. And that flawed model is the invisible scaffolding that supports our surveys, our focus groups, our R&D, and much of our long-term strategic planning. In The Moment of Clarity, Christian Madsbjerg and Mikkel Rasmussen examine the business world's assumptions about human behavior and show how these assumptions can lead businesses off track. But the authors chart a way forward. Using theories and tools from the human sciences—anthropology, sociology, philosophy, and psychology—The Moment of Clarity introduces a practical framework called sensemaking. Sensemaking's nonlinear problem-solving approach gives executives a better way to understand business challenges involving shifts in human behavior. For fans of Black Mirror and True Detective, a visceral, high-concept thriller about a psychologist who must protect the life of an eleven-year-old girl whose ability to remember past lives makes them both targets of a ruthless assassin. Dr. Matilda Deacon is a psychologist researching how memories are made and stored when she meets a strange eleven-year-old girl named Ashanique. The girl claims to harbor the memories of the last soldier killed in World War I and Matilda is skeptical. But when Ashanique starts talking about being chased by the Night Doctors—a term also used by an unstable patient who was later found dead—Matilda can't deny that the girl might be telling the truth. Matilda soon learns that Ashanique and her mother have been on the run their whole lives from a monstrous assassin named Rade. Rade is seeking a certain component ingrained solely in memories, and has left a bloody trail throughout the world. Matilda realizes that Ashanique is in unimaginable danger and that her unique ability comes with a deadly price. "A taut, riveting thriller, a perfect balance of scientific speculation and storytelling" (James Rollins, New York Times bestselling author), The Clarity is a compelling take on the possibilities of reincarnation and life after death.
