Inequality in Education: Comparative and International Perspectives is a compilation of conceptual chapters and national case studies that includes a

Online Library Api 582

series of methods for measuring education inequalities. The book provides up-to-date scholarly research on global trends in the distribution of formal schooling in national populations. It also offers a strategic comparative

Online Library Api 582

and international education policy statement on recent shifts in education inequality, and new approaches to explore, develop and improve comparative education and policy research globally. Contributing authors

Online Library Api 582

examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic

Online Library Api 582

regions, the volume includes six conceptual chapters on topics that influence education inequality, such as gender, disability, language and economics, and a summary chapter that presents new

Online Library Api 582

evidence on the pernicious consequences of inequality in the distribution of education. The book offers (1) a better and more holistic understanding of ways to measure education inequalities; and (2) strategies for facing the

Online Library Api 582

challenge of inequality in education in the processes of policy formation, planning and implementation at the local, regional, national and global levels.

Extensions and Libraries completes the Apress Java learning journey and is a comprehensive approach to learning the Java Swing, JavaFX, Java Scripting, JDBC and network programming APIs.

Online Library Api 582

This book covers the key extensions of the Java programming language such as Swing, JavaFX, network programming, and JDBC. Each topic starts with a discussion of the topic's background. A step-by-

Online Library Api 582

step process, with small snippets of Java code, provides easy-to-follow instructions. At the end of a topic, a complete and ready-to-run Java program is provided. This book contains over 130 images and diagrams to help you

Online Library Api 582

visualize and better understand the topics. More than 130 complete programs allow you to practice and quickly learn the topics. The Swing chapters discuss various aspects of working with a GUI, from the very

Online Library Api 582

basic concepts of developing a Swing application, to the most advanced topics, such as decorating a Swing component with a JLayer, drag-and-drop features, Synth Skinnable L&F, etc. The chapter on network

Online Library Api 582

programming covers the basics of network technologies first, and then, the advanced topics of network programming, using a Java class library. It covers IPv4 and IPv6, addressing schemes, subnetting, supernetting,

Online Library Api 582

multicasting, TCP/IP sockets, UDP sockets, asynchronous socket I/O, etc. The chapter on JDBC provides the details of connecting and working with databases such as Oracle, SQL Server, MySQL, DB2, Java DB

Online Library Api 582

(Apache Derby), Sybase, Adaptive Server Anywhere, etc. It contains a complete discussion on processing a ResultSet and a RowSet. It discusses how to use the RowSetFactory, to obtain a RowSet object of a specific type.

Today's industrial economy functions through the combined efforts of two principal groupings

Online Library Api 582

of persons: employers and employees, management and labor, bosses and workers. Their main operative relation is the wage contract, by which the employees agrees to work under the direction of the employer for

Online Library Api 582

monetary remuneration, on materials and with instruments which are owned by, or in the charge of, the employer or manager. In the modern capitalist system these means of production are in very great

Online Library Api 582

proportion owned by individuals, families, partners or incorporated companies. Although through widespread ownership of stocks, bonds or shares title to a particular company is often in the hands of tens of thousands of

Online Library Api 582

persons, this system is popularly called private enterprise. This is to be distinguished from ownership or control of productive means by the state or political collectivity through socialization or nationalization of

Online Library Api 582

property. In the economies of most Western nations modern capitalism combines in some proportion both these system of ownership in a mixed economy.

Java Network Programming, Third Edition, brings you up-to-date with the latest features of Java's network APIS. This book

discusses all the changes and additions to networking in JDK 1.4 and 1.5 (now christened J2SE 5). It covers everything from networking fundamentals to remote

method invocation (RMI), including chapters on TCP and UDP sockets, server sockets, URLs and URIs, multicasting, and special-purpose APIS such as JavaMail. This book shows

you how to use JSSE to write secure networking applications and explains how to use the NIO APIs to write ultra high-performance servers. And it covers Java's support

for network proxies, web cookies, and URL caching. Java Network Programming doesn't just explain the APIS: it shows you how to put them to work. This book is full of

examples; it contains thousands of lines of working code (all of which are available online), implementing fully functional network clients and servers.

Whether you want to write a special-purpose web server, a secure online order taker, a simple multicast agent, or even an email client, you'll find code that you

can learn from and borrow. Whether you're an experienced network developer, a new Java programmer, or someone who just wants to see what's possible, you'll
