This report presents the conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge, skills and well-being. Like previous cycles, the 2018 assessment covered reading, mathematics and science, with the major focus this cycle on reading literacy, plus an evaluation of students' global competence – their ability to understand and appreciate the perspectives and world views of others. Financial literacy was also offered as an optional assessment.

Recommended for primary and middle school students, Universal Science is a series of eight books that adheres to the National Curriculum Framework (2005). The books have been designed in accordance with the latest guidelines laid down by the National Council of Educational Research and Training. This comprehensive book is specially developed for the candidates of National Means Cum Merit Scholarship Exam (For Class VIII). This book includes Study Material & Previous Papers for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates

Targeting Mathematics series consists of nine textbooks; one for Primer and eight textbooks for classes 1–8. These books have been formulated strictly in accordance with the Continuous and Comprehensive Evaluation (CCE) approach of Central Board of Secondary Education (CBSE) and are based on the latest syllabus. The series also conforms to the guidelines of National Curriculum Framework 2005. The books have been written by experienced and renowned authors.

1. Chapter-wise presentation for systematic and methodical study 2. Strictly based on the latest CBSE Curriculum and National Curriculum Framework. 3. All Questions from the Latest NCERT Textbook are included. 4. Previous Years' Question Papers from Kendriya Vidhyalaya Sangathan are included. 5. Latest Typologies of Questions developed by Oswaal Editorial Board included. 6. Mind Maps in each chapter for making learning simple. 7. 'Most likely Questions' generated by Oswaal Editorial Board with 100+ years of teaching experience.

This text guides the reader through the varying approaches to translation studies in the latter half of the 20th century. Chronologically ordered and divided into clear sections, it collects together key essays, articles and book extracts.

The Handbook of Inclusive Education advocates the importance of inclusive education. It presents a collection of various models, practices, experiences, first-hand accounts and success stories from India, where inclusive education has been implemented. It also identifies and analyzes challenges to the Indian education system, while offering possible strategies and solutions for all education systems implementing inclusion policies. The book is divided into three parts. Part one gives an overview of the concept and practice of inclusive education and also discusses legal and policy aspects. Part two describes innovative practices in the implementation of inclusive education for children with a wide range of disabilities, such as: – Hearing

Impairment - Visual Impairment - Orthopedic Impairment - Learning Disability - Cerebral Palsy - Intellectual Impairment - Autism Spectrum Disorders. Part three discusses current developments in the fields of inclusive education and describes what a 'real' inclusive school should be like.

Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quality time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the best solution. These principles fundamentally change the way you work and interact. They have been adopted by businesses and governments around the world to end conflict and confusion in favour of harmony.

Understanding ISC Mathematics, for class 11 - sections A, B & C, has been written by Mr. M.L. Aggarwal (Former Head of P.G. Department of Mathematics, D.A.V. College, Jalandhar) strictly according to the syllabus prescribed by the Council for the Indian School Certificate Examinations, New Delhi in the year 2015 and onwards for students of class 11. A new feature - Typical Illustrative Examples have been added in some chapters for those students who want to attempt some more challenging problems. The entire matter in the book is given in a logical sequence so as to develop and strengthen the students' understanding of the subject.

Awareness Science is a series of science books for classes 1-8 for the schools following CBSE Syllabus.

A text book on Social

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing a leading authority on media literacy education shows secondary teachers how to incorporate media literacy into the curriculum, teach 21st-century skills, and select meaningful texts.

The young and adolescents are an epitome of change, hope and progress. The lives of adolescents are subject to global challenges faced by information and technological revolution, changing marriage patterns and specific changes taking place in family dynamics, cultural traditions, religious beliefs and other socialization practices. This book on Adolescence Education assumes importance in view of the changing skills and behaviours during this period on an individual's prospects in adulthood. This book is an attempt to understand the broader context in which adolescent lives are embedded. The theoretical and multi-disciplinary view of adolescence that helps to understand the evolution of the concept of adolescence. Presenting an elaborate account of adolescence as experienced by young in India and other countries that emerge as a result of dynamic changes in society, the attempt is made to identify the emerging issues and concerns that impact the lives of adolescents and provide a perspective to adolescents. The account presented helps to build an understanding of the various socio-cultural forces that led to the emergence of the existing Adolescence Education Programme (AEP). The text presents the key features of the AEP that are imperative for its successful implementation. The UN and civil society initiatives are mapped with a view to locate the characteristic features and thrust of various interventions. The book also provides insights from available evidences regarding execution of various existing adolescent programmes, and existential realities of adolescents' lives. The book is intended for the undergraduate and postgraduate students of Education, Psychology and Sociology. Besides, the book is equally beneficial for the students opting for Psychology at their +2 level.

*E-assessments of students profoundly influence their motivation and play a key role in the educational process. Adapting assessment techniques to current technological advancements allows for effective pedagogical practices, learning processes, and student engagement. The Handbook of Research on E-Assessment in Higher Education provides emerging perspectives on the theoretical and practical aspects of digital assessment techniques and applications within educational settings. Featuring coverage on a broad range of topics such as competency assessment, adaptive courseware, and learning performance, this publication is ideally designed for educational administrators, educational professionals, teachers and professors, researchers, and graduate-level students seeking current research on comparative studies and the pedagogical issues of online assessment in academic institutions.*

*This volume discusses the need for a major paradigm shift in educational practice in the current digital and globalized world. It establishes a bridge between theory and praxis and revisits the objectives of learning and its modalities within the context of a rapidly evolving global world order. This volume includes perspectives from different countries on creating a dynamic and adaptive education system that encourages creativity, leadership, flexibility, and working in virtual as well as inclusive environments. The four sections include chapters that discuss creating meaningful learning environments, preparing teachers for new age classrooms, the digital learning space, fostering change in classrooms, and importantly also includes cases and experiments from schools. The authors are teacher educators, teachers and researchers, and each chapter, while being deeply rooted in theory, is juxtaposed with informed practice, making the suggestions easy to implement in different settings. This is an important resource for researchers and practitioners associated with education systems in creating engaging, meaningful and future-ready education practices.*

*The series, Awareness Social Sciences for classes VI, VII and VIII is based on the syllabus as specified by NCERT for the latest sessions. The syllabus has tried to link the academic curriculum with real life and, thus, dwelled on connecting the students' understanding with the real world around them. Accordingly, this book has incorporated real life examples, case studies, story lines and narratives which could be immensely helpful in assimilation and to inculcate interests among the students significantly.*
