Online churches are internet-based Christian communities, pursuing worship, discussion, friendship, support, proselytization, and other key religious goals through computer-mediated communication. Hundreds of thousands of people are now involved with online congregations, generating new kinds of ritual, leadership, and community and new networks of global influence.

Creating Church Online constructs a rich ethnographic account of the

diverse cultures of online churches, from virtual worlds to video streams. This book also outlines the history of online churchgoing, from its origins in the 1980s to the present day, and traces the major themes of academic and Christian debate around this topic. Applying some of the leading current theories in the study of religion, media and culture to this data, Tim Hutchings proposes a new model of religious design in contexts of mediatization, and draws attention to digital networks, transformative third spaces and terrains of existential vulnerability. *Creating Church Online* advances our understanding of the significance and impact of digital media in the religious and social lives of its users,

We are living through a digital revolution which already touches every area of life and will continue to shape the future in as yet unforeseen ways. Digital technologies are an ordinary part of daily

life, and yet they also present an unprecedented challenge to Christians to articulate a biblical, theological framework to navigate times of rapid change. The work of the French theologian Jacques Ellul is a theological time-bomb primed for times like these. Accounts of Ellul's career often divide off his sociology and theology, but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God, tackling the phenomenon he named

technique, the pursuit of maximal power and efficiency implicit in the technological enterprise, with a profound depth of biblical and ethical insight. Centering himself on the apocalypse or revelation of Jesus Christ in history, Ellul offers a monumental, timely (though far from flawless) contribution to contemporary ethical debates about the uses and abuses of technologies. His work blazes a trail that Christians and all concerned for the future would do well to follow,

Historical Information Science is an extensive review and bibliographic essay, backed by almost 6,000 citations, detailing developments in information technology since the advent of personal computers and the convergence of several social science and humanities disciplines in historical computing. The emergence of Pentecostalism in Ghana has attracted a massive following and generated institutions that have significantly impacted Christian discourse and national life. The movement has produced prominent leaders who have developed exemplary Christian education programs and generated volumes of Christian literature unprecedented in Ghanaian Christianity. Nevertheless, public opinion often upbraids church leaders for unethical conduct. Despite the concern for high moral standards set by Pentecostal church polity and

ministerial ethical codes, reports of Pentecostal ministerial misconduct appear regularly in the media.

Although congregation members and perceptive public observers appreciate the constructive moral impact of Pentecostal ministers, instances of promiscuity, power abuse, financial misappropriation, and superstition reveal a gap between ethical ideals and practice. As this research reveals, factors behind unethical ministerial conduct include inadequate training, poor accountability, and a general low level of ethical reflection. Good Pastors, Bad Pastors suggests that a multidimensional approach of responsible reportage, emphatic moral education, appropriate but sympathetic response to moral failure, and peer-review accountability could help uphold a higher standard of ministerial

Malls, stadiums, and universities are actually liturgical structures that influence and shape our thoughts and affections. Humans--as Augustine noted--are "desiring agents," full of longings and passions; in brief, we are what we love. James K. A. Smith focuses on the themes of liturgy and desire in *Desiring the Kingdom*, the first book in what will be a three-volume set on the theology of culture. He redirects our yearnings to focus on the greatest good: God. Ultimately, Smith seeks to re-vision education through the process and practice of worship. Students of philosophy, theology, worldview, and culture will welcome *Desiring the Kingdom*, as will those involved in ministry and other interested readers.
