Which military missions for unmanned undersea vehicles (UUVs) appear most promising to pursue in terms of military need, operational and technical risks, alternatives, and cost? To answer this question, the authors assess risks associated with using UUVs for advocated missions, identify non-UUV alternatives that may be more appropriate for such missions, and analyze potential costs associated with UUV development and use. They conclude that seven missions: mine countermeasures, deployment of leave-behind surveillance sensors or sensor arrays, near-land and harbor monitoring, oceanography, monitoring undersea infrastructure, anti-submarine warfare tracking, and inspection/identification - appear most promising. Among other recommendations, the authors suggest that the U.S. Navy consolidate its unmanned system master plans and establish relevant priorities in coordination with the Office of the Secretary of Defense. Increased emphasis on the use of surface platforms rather than submarines as host platforms is recommended.

I would have climbed up a mountain to get on the list [to serve overseas]. We were going to do our duty. Despite all the bad things that happened, America was our home. This is where I was born. It was where my mother and father were. There was a feeling of wanting to do your part. --Gladys Carter, member of the 6888th To Serve My Country, to Serve my Race is the story of the historic 6888th, the first United States Women's Army Corps unit composed of African-American women to serve overseas. While African-American men and white women were invited, if belatedly, to serve their country abroad, African-American women were excluded for overseas duty throughout most of WWII. Under political pressure from legislators like Adam Clayton Powell, Jr., the NAACP, the black press, and even President Roosevelt, the U.S. War Department was forced to deploy African-American women to the European theater in 1945. African-American women, having succeeded, through their own activism and political ties, in their quest to shape their own lives, answered the call from all over the country, from every socioeconomic stratum. Stationed in France and England at the end of World War II, the 6888th brought together women like Mary Daniel Williams, a cook in the 6888th who signed up for the Army to escape the slums of Cleveland and to improve her ninth-grade education, and Margaret Barnes Jones, a public relations officer of the 6888th, who grew up in a comfortable household with a politically active mother who encouraged her to challenge the system. Despite the social, political, and economic restrictions imposed upon these African-American women in their own country, they were eager to serve, not only out of patriotism but out of a desire to uplift their race and dispell bigoted preconceptions about their abilities. Elaine Bennett, a First Sergeant in the 6888th, joined because "I wanted to prove to myself and maybe to the world that we would give what we had back to the United States as a confirmation that we were full-fledged citizens." Filled with compelling personal testimony based on extensive interviews, To Serve My Country is the first book to document the lives of these courageous pioneers. It reveals how their Army experience affected them for the rest of their lives and how they, in turn, transformed the U.S. military forever.

This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team, which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives. The team was charged with considering the space domain in a broad and holistic way, incorporating a wide range of perspectives from U.S. and international space actors engaged in scientific, commercial, intelligence, and military enterprises. This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend, modify, refine, and integrate a broad range of viewpoints about human-initiated space activity, its relationship to our globalized society, and its economic, political, and security interactions. It will equip practitioners, scholars, students, and citizens with the historical background and conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment.

"This may be the most exhilarating and revelatory history of our country. It is must reading for today's youth-as well as their elders." --Studs Terkel From the boys who sailed with Columbus to today's young activists, this unique book brings to life the contributions of young people throughout American history. Based on primary sources and including 160 authentic images, this handsome oversized volume highlights the fascinating stories of more than 70 young people from diverse cultures. Young readers will be hooked into history as they meet individuals their own age who were caught up in our country's most dramatic moments-Olaudah Equiano, kidnapped from his village in western Africa and forced into slavery, Anyokah, who helped her father create a written Cherokee language, Johnny Clem, the nine-year-old drummer boy who became a Civil War hero, and Jessica Govea, a teenager who risked joining Cesar Chavez's fight for a better life for farmworkers. Throughout, Philip Hoose's own lively, knowledgeable voice provides a rich historical context-making this not only a great reference-but a great read. The first U.S. history book of this scope to focus on the role young people have played in the making of our country, its compelling stories combine to tell our larger national story, one that prompts Howard Zinn, author of A People's History of the United States, to comment, "This is an extraordinary book-wonderfully readable, inspiring to young and old alike, and unique." We Were There, Too! is a 2001 National Book Award Finalist for Young People's Literature.

This is a practical guide to the historical study of international politics. The focus is on the nuts and bolts of historical research--that is, on how to use original sources, analyze and interpret historical works, and actually write a work of history. Two appendixes provide sources sure to be indispensable for anyone doing research in this area. The book does not simply lay down precepts. It presents examples drawn from the author's more than forty years' experience as a working historian. One important chapter, dealing with America's road to war in 1941, shows in unprecedented detail how an interpretation of a major historical issue can be developed. The aim throughout is to throw open the doors of the workshop so that young scholars, both historians and political scientists, can see the sort of thought processes the historian goes through before he or she puts anything on paper. Filled with valuable examples, this is a book anyone serious about conducting historical research will want to have on the bookshelf.

Assembling more than 30 primary documents — including proposals, memoranda, decrypted messages, and imperial conferences — Iriye presents diplomatic exchanges from both American and Japanese perspectives to determine how and why the United States and Japan went to war in 1941. A detailed introduction provides background on Japanese aggression in China and Southeast Asia during the 1930s and economic unrest and isolationism in the United States. Readings add an interpretive dimension, placing Pearl Harbor in global context; essays from American, Japanese, Chinese, Soviet, German, British, and Indonesian perspectives explain how various countries applied pressure, offered assistance, exacerbated rifts, and significantly affected negotiations and Japan's ultimate decision for war.

The timeless classic from the iconic Dr. Seuss — now available in ebook, with read-along narration performed by Miranda Richardson. Enjoy this classic tale of a big-hearted elephant anytime, anywhere! A special 60th anniversary edition of the bestselling re-creation of the surprise attack on Pearl Harbor, by the author of A Night to Remember. Sunday, December 7, 1941, was, as President Roosevelt said,

"a date which will live in infamy." Day of Infamy is a fascinating account of that unforgettable day's events. In brilliant detail Walter Lord traces the human drama of the great attack: the spies behind it; the Japanese pilots; the crews on the stricken warships; the men at the airfields and the bases; the Japanese pilot who captured an island single-handedly when he could not get back to his carrier; the generals, the sailors, the housewives, and the children who responded to the attack with anger, numbness, and magnificent courage. In piecing together the saga of Pearl Harbor, Lord traveled over fourteen thousand miles and spoke or corresponded with over five hundred individuals who were there. He obtained exclusive interviews with members of the Japanese attacking force and spent hundreds of hours with the Americans who received the blow -- not just the admirals and generals, but enlisted men and families as well. He visited each of the Hawaiian bases attacked and pored over maps, charts, letters, diaries, official files, newspapers, and some twenty-five thousand pages of testimony, discovering a wealth of information that had never before been revealed. Day of Infamy is an inspiring human document and the best account we have of one of the epic events in American history.

During World War II a community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors. This monograph is a collection of articles on productivity and related topics submitted by speakers at an interdisciplinary November 2017 conference sponsored by, among others, the CFA Institute Research Foundation, with additional articles solicited by the editors from noted experts on the field. In clear, concise language, this book deals with fundamental issues that must be addressed if teachers are to construct coherent and powerful history curricula, including: What are the purposes and goals that different types of teachers establish for their history teaching?, and What do children know and think about history, and what are the teaching implications for our schools? This book represents a major advance in developing a knowledge base about children's historical learning and thinking that applies to history teaching some of the principles involved in teaching for understanding and conceptual change teaching, methods that have been so successful in other school subjects.

Using previously unreleased documents, the author reveals new evidence that FDR knew the attack on Pearl Harbor was coming and did nothing to prevent it.

This book, "Pearl Harbor to Guadalcanal: History of U. S. Marine Corps Operations in World War II, Volume I," covers Marine Corps participation through the first precarious year of World War II, when disaster piled on disaster and there seemed no way to check Japanese aggression. Advanced bases and garrisons were isolated and destroyed; Guam, Wake, and the Philippines. The sneak attack on Pearl Harbor, "day that will live in infamy," seriously crippled the U. S. Pacific Fleet; yet that cripple rose to turn the tide of the entire war at Midway. Shortly thereafter, the U. S. Marines launched on Guadalcanal an offensive which was destined to end only on the home islands of the Empire. The country in general, and the Marine Corps in particular, entered World War II in a better state of preparedness than had been the case in any other previous conflict. But that is a comparative term and does not merit mention in the same sentence with the degree of Japanese preparedness. What the Marine Corps did bring into the way, however, was the priceless ingredient developed during the years of pence: the amphibious doctrines and techniques that made possible the trans-Pacific advance and, for that matter, the invasion of North Africa and the European continent. By publishing this operations history in a durable form, it is hoped to make the Marine Corps record permanently available for the study of military personnel, the edification of the general public, and the contemplation of serious scholars of military history.
