Gynaecology in Primary Care comes at a time of great change in health service delivery. General practice is facing the challenges of developing Clinical Commissioning Groups, providing an ever greater range of primary care services and implementing NICE

guidelines, whilst CCGs through their members will be under a legal duty to innovate. From a provider perspective, the book equips general practitioners with up-to-date knowledge of common gynaecological conditions, suggestions of best practice with regard to management and investigations to be undertaken within primary care, and guidelines for onward referral, where this is appropriate and necessary. From a commissioning perspective it provides an invaluable resource to CCGs, to inform their future pathways for gynaecology care. This highly practical book delivers the main aim of the RCP report - to ensure best care for female patients in the setting of their choice and where possible to develop streamlined one-stop services in primary care so that women do not have to take time off from their work and family commitments. It is ideal for general practitioners needing to be inspired and informed, and is also highly recommended for other healthcare professionals and medical students with an interest in women's health.
