Nursing Assessment

The purpose of this series is to help nursing students review course content, prepare for classroom tests, and practice for the NCLEX examination for RN's. Each book is divided into sections that reflect the principal organization of course content for that nursing speciality. In this particular text the following areas are covered: the interview and health history; types of assessment; special populations and issues; the integumentary system; the head and axillae; the abdomen; the musculoskeletal system; the nervous systems. Health Assessment & Physical Examination, 2E is the new

standard in Nursing Assessment. Comprehensive in scope, with engaging full-color photographs, the completely revised second edition presents physical assessment skills, clinical examination techniques and patient teaching guidelines in a manner that is easily read and assimilated. Whether a patient is young or old, well or ill, assessment is an ongoing process that evaluates the whole person as a physical, psychosocial, functional being. Health Assessment & Physical Examination provides an innovative, beautifully illustrated approach to assessment. NEW TO EDITION: New Chapter on Eyes allows an increased focus on the
