

Pgdca Question Paper For 2nd Sem Mcu

Present book has been specially published for the aspirants of Entrance Exam for admission to M.A. (International Relations and Area Studies) course conducted by the Jawaharlal Nehru University, Delhi. Salient Features of the Book: - The book comprises, along with the Specialised Study Material, Solved Previous Year Paper to make you well-conversant with the exam pattern, the type of questions asked and their appropriate answers for Better Understanding. - The book contains ample Study and Practice Material with numerous Multiple Choice Question-Answers on all the relevant chapters & topics. - Both the Study and Practice Material have been prepared by learned Subject-expert. The book will serve both as Study Material and a True Test of your preparation for the exam. - It is believed, the book will prove very useful for study, practice and during precious moments before the exam for reference and revision. It is highly recommended to Sharpen your Problem Solving Skills with thorough practice of numerous questions provided in the book, and prepare yourself to face the exam with Confidence, Successfully. While the specialised study and practice material of this book is aimed to professionally guide you for the exam, your own intelligent study and practice in harmony with this will Ensure you a definite Success in your endeavour and a seat in the Prestigious Course.

For over 20 years, Software Engineering: A Practitioner's Approach has been the best selling guide to software engineering for students and industry professionals alike. The sixth edition continues to lead the way in software engineering. A new Part 4 on Web Engineering presents a complete engineering approach for the analysis, design, and testing of Web Applications, increasingly important for today's students. Additionally, the UML coverage has been enhanced and significantly increased in this new edition. The pedagogy has also been improved in the new edition to include sidebars. They provide information on relevant software tools, specific work flow for specific kinds of projects, and additional information on various topics. Additionally, Pressman provides a running case study called "Safe Home" throughout the book, which provides the application of software engineering to an industry project. New additions to the book also include chapters on the Agile Process Models, Requirements Engineering, and Design Engineering. The book has been completely updated and contains hundreds of new references to software tools that address all important topics in the book. The ancillary material for the book includes an expansion of the case study, which illustrates it with UML diagrams. The On-Line Learning Center includes resources for both instructors and students such as checklists, 700 categorized web references, Powerpoints, a test bank, and a software engineering library-containing over 500 software engineering papers.TAKEAWY HERE IS THE FOLLOWING:1. AGILE PROCESS METHODS ARE COVERED EARLY IN CH. 42. NEW PART ON WEB APPLICATIONS --5 CHAPTERS

This Thoughtfully Organized Book Has Been Designed To Provide Its Readers With A Sound Foundation Of Computers And Information Technology. The Number Of Chapters, Chapter Topics, And The Contents Of Each Chapter Have Been Carefully Chosen To Introduce The Readers To All Important Concepts Through A Single Book. Each Chapter Addresses The Fundamental Concepts, Popular Technologies, And Current State-Of-The-Art Topics. Complete With Numerous Illustrations And Examples, Chapter Summaries, End-Of-Chapter Questions, And A Glossary Of Important Terms, Foundations Of Computing Is Designed To Serve As An Ideal Textbook For Various Courses Offered In Computer Science, Information Technology, And Other Related Areas. You Will Find Sufficient Coverage Of All Major Topics In The Field, Including Several New And Advanced Topics, Such As:Software Engineering,Object-Oriented Programming,Network, Distributed, And Real-Time Operating Systems,Unix, Windows, And Linux Operating Systems,Relational, Object-Oriented, And Multimedia Databases,Data Warehousing And Data Mining,Information Security In Computer Systems,Multimedia Computing Systems And Applications,Wireless Networks,The Internet,And Many More&..

These Application Gives Users The Power And Ease Of Users Of Use Of A G. U. I. With The Multi Users Capabilities Of Novell Or Unix Based Rdbms Engines Such As Oracle.

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-034: Software Engineering Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Software Process Models, Project Management, Software Requirements Analysis, Requirement Engineering Process, Software System Specifications, Software Metrics and Measures, Application Systems and Design Issues, Software Development Methods and Reuse, Verification and Validation, Software Testing and Cost Estimation, Quality Management, Process Improvement and Measurement. Published by MeetCoogle

The new edition of a bestseller, now revised and update throughout! This new edition of the unparalleled bestseller serves as a full training course all in one and as the world's largest data storage company, EMC is the ideal author for such a critical resource. They cover the components of a storage system and the different storage system models while also offering essential new material that explores the advances in existing technologies and the emergence of the "Cloud" as well as updates and vital information on new technologies. Features a separate section on emerging area of cloud computing Covers new technologies such as: data de-duplication, unified storage, continuous data protection technology, virtual provisioning, FCoE, flash drives, storage tiering, big data, and more Details storage models such as Network Attached Storage (NAS), Storage Area Network (SAN), Object Based Storage along with virtualization at various infrastructure components Explores Business Continuity and Security in physical and virtualized environment Includes an enhanced Appendix for additional information This authoritative guide is essential for getting up to speed on the newest advances in information storage and management.

Designed for high school students and revised for a new generation of learners! Jacobs Elementary Algebra has come to be highly regarded in the education market. This curriculum provides a full year of mathematics in a clearly written format with guidance for teachers as well as for students who are self-directed. Student textbook includes easy-to-follow instruction and selected answers in the back.Lessons are divided into 17 chapters, covering functions and graphs, integers, rational numbers, exponents, polynomials, factoring, fractions, and more.The course builds a solid foundational understanding and application of key concepts. Also Available: The Elementary Algebra Teacher Guide provides a detailed schedule, tests, and test answer keys as well as additional exercises. The Solutions Manual for Elementary Algebra helps the student with understanding the answers from the book.

The present book is specially published for the aspirants of MA (Geography) Entrance Exam conducted by the University of Delhi. The book is highly recommended to study and Sharpen your Problem Solving Skills with thorough practice of numerous questions provided in the book, and prepare you to face the exam with Confidence, Successfully. The book comprises the Specialised Study and Practice Material along with Previous Years' Solved Paper to make you familiar with the exam pattern and the type of questions asked, with their appropriate answers. Practicequestions have been modelled on the basis of questions asked in previous exam papers and solved by respective subjectexperts. Detailed Explanatory Answers have also been provided for the Selected Questions for Better Understanding of readers. Based on the Latest Pattern of Exam, the book will prove very useful for study, practice and during the precious moments before the exam for reference and revision. While the specialised study and practice material of this book is aimed to prepare you for Sure Success, your own intelligence and practice, in harmony with this, will definitely Ensure you a Seat in the Prestigious Course paving the way for a Bright Future.

The 6th Computer Applications in Biotechnology (CAB6) conference was a continuation of 2 series of events: the IFAC symposia on Modelling and Control of Biotechnical Processes and the International Conferences on Computer Applications in Fermentation Technology. This conference provided the opportunity for both sides, leading researchers and industrial practitioners, in this interdisciplinary field to exchange new ideas and technology; concepts and solutions. This postprint volume contains all those papers which were presented at the conference.

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-041: Operating System Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Introduction: Definition and types of operating systems, Batch Systems, multi programming, time-sharing parallel, distributed and real-time systems, Operating system structure, Operating system components and services, System calls, system programs, Virtual machines. Process Management: Process concept, Process scheduling, Cooperating processes, Threads, Inter-process communication, CPU scheduling criteria, Scheduling algorithms, Multiple processor scheduling, Real-time scheduling and Algorithm evaluation. Process Synchronization and Deadlocks: The Critical-Section problem, synchronization hardware, Semaphores, Classical problems of synchronization, Critical regions, Monitors, Deadlocks-System model, Characterization, Deadlock prevention, Avoidance and Detection, Recovery from deadlock, Combined approach to deadlock handling. Storage management: Memory Management-Logical and Physical Address Space, Swapping, Contiguous Allocation, Paging, Segmentation with paging, Virtual Memory, Demand paging and its performance, Page replacement algorithms, Allocation of frames, Thrashing, Page Size and other scheduling considerations, Demand segmentation. File systems, secondary Storage Structure, File concept, access methods, directory implementation, Efficiency and performance, recovery, Disk structure, Disk scheduling methods, Disk management, Recovery, Disk structure, disk scheduling methods, Disk management, Swap-Space management, Disk reliability. Published by MeetCoogle

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-021-Data and File Structures Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Basic data structures such as arrays, stack and queues and their applications, linked and sequential representation. Linked list, representation of linked list, multi linked structures. Trees: definitions and basic concepts, linked tree representation, representations in contiguous storage, binary trees, binary tree traversal, searching insertion and deletion in binary trees, heap tree and heap sort algorithm, AVL trees. Graphs and their application, sequential and linked representation of graph - adjacency matrix, operations on graph, traversing a graph, Dijkstra's algorithm for shortest distance, DFS and BFS, Hashing. Searching and sorting, use of various data structures for searching and sorting, Linear and Binary search, Insertion sort, Selection sort, Merge sort, Radix sort, Bubble sort, Quick sort, Heap Sort. Published by MeetCoogle

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-013: Discrete Mathematics Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Discrete Mathematical Structures, Formal Methods: Introduction and Analogy, Abstraction. Fundamentals: Sets & Relations- Sets, Types of Sets, Multi Sets, Operations on Sets, Relations and Properties of Relations, Representation of Relations, Equivalence Relation, Closures of Relations, Methods of Proof-Direct Proofs, Indirect Proofs, Mathematical Induction, Method of Contradiction. Combinatorics: Permutations and Combinations, Pigeon Hole Principle, Principle of Inclusion and Exclusion, Generating Functions. Mathematical Logic, Posets and Lattices: Partial Order Set, Bounding Elements, Well Ordered Set, Topological Sorting, Lattices, Principle of Duality, Bounded, Distributed, and Complemented Lattices, Proposition and Propositional Calculus. Graphs and Group Theory: Basic Introduction of Graphs- Types of Graphs, Path and Circuits, Eulerian Path and Circuits, Hamiltonian Path and Circuits, Shortest Path Algorithms, Group. Definitions and Properties, Coset& Subgroup, Normal subgroup, Homomorphism of groups, Cyclic Group, Permutation Group. Finite State Machines and Languages: Grammar and Languages- Phrase structure Grammar, Types of Grammars and Languages, Finite State Machines and Languages, Minimization of Finite State Machines. Published by MeetCoogle

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-011: Problem Solving and Programming Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Problem Solving with Computers: Algorithms, and Flowcharts. Data types, constants, variables, operators, data input and output, assignment statements, conditional statements, string and character handling, data validation examples. Iteration, arrays, strings processing, defining function, types of functions, function prototype, passing parameters, recursion. Storage class specifiers, pre-processor, header files and standard functions. Pointers: Definition and uses of pointers, pointer arithmetic, pointers and array, pointers and functions, pointer to pointer. Structures, union, pointers to structures, user-defined data types, enumeration. Data files: Opening, closing, creating, processing and unformatted data files. Introduction to Dynamic Memory Allocation, command line arguments, systems calls. Published by MeetCoogle

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-024: Introduction to Database Management Systems Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. It comprises of details about: • Introduction to object oriented software engineering • Advanced Structured Modeling • Object Oriented Concepts and Project Management • Object oriented design and testing • Advanced topic in S/W engineering • Multiple Choice Questions

This book "discusses advanced features of software applications, a section which has been thoroughly expanded for this new edition, as well as software customisation, systems administration, client support, production of technical and training documentation, and researching and implementing new technology." --- back cover.

This book is designed for Computer Science students taking their GATE, GRE and other competitive examinations, e.g. examinations for Public Sector Undertakings and placement examinations for software firms. It can also act as a powerful self-evaluation tool for the students of Computer Science and Engineering, MCA, B.Sc.(Computer Science), BCA and PGDCA. Updated With: Inclusion of a new chapter on Oracle covering SQL, PL/SQL, SQL*Plus, Reports and Forms. Expanded coverage of Principles of Programming Languages, Mathematical Foundation of Computer Science, Operating Systems and Data Structures. Over 280 new exercises and updated problems. A hundred more explanations to exercise-answers. Key Features: Over 1950 Multiple-Choice Questions to fully arm the student for competitive exminations. Includes answers to all questions. Provides a brief explanation for 620 choosen tricky questions. Includes questions from previous years' papers of the GATE examination, GRE's subject test in Computer Science and questions from the screening tests conducted by organisations for placement. Question paper of GATE 2005 included.

This book is useful for IGNOU MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-031: Design and Analysis of Algorithm Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Algorithm definition and specification – Design of Algorithms, and Complexity of Algorithms, Asymptotic Notations, Growth of function, Recurrences, Performance analysis – Elementary Data structures:- stacks and queues – trees – dictionaries – priority queues –sets and disjoint set union – graphs – basic traversal and search techniques. Divide – and – conquer:- General method – binary search – merge sort – Quick sort. The Greedy method:-General method – knapsack problem – minimum cost spanning tree – single source shortest path. Dynamic Programming – general method – multistage graphs – all pair shortest path – optimal binary search trees – 0/1 Knapsack – traveling salesman problem – flow shop scheduling. Backtracking:- general method – 8-Queens problem – sum of subsets – graph coloring – Hamiltonian cycles – knapsack problem – Branch and bound:- The Method – 0/1 Knapsack problem – traveling salesperson. Parallel models:-Basic concepts, performance Measures, Parallel Algorithms: Parallel complexity, Analysis of Parallel

Addition, Parallel Multiplication and division, parallel. Evaluation of General Arithmetic Expressions, First-Order Linear recurrence. Published by MeetCoogle

This textbook introduces the “Fundamentals of Multimedia”, addressing real issues commonly faced in the workplace. The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia. Fully revised and updated, this new edition now includes coverage of such topics as 3D TV, social networks, high-efficiency video compression and conferencing, wireless and mobile networks, and their attendant technologies. Features: presents an overview of the key concepts in multimedia, including color science; reviews lossless and lossy compression methods for image, video and audio data; examines the demands placed by multimedia communications on wired and wireless networks; discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval; includes study exercises at the end of each chapter; provides supplementary resources for both students and instructors at an associated website.

Create, edit, manipulate, and export images the right way. Increase the productivity, accuracy, and efficiency level of your operation in CorelDraw to an unimaginable height. Grab the all-in-one knowledge of CorelDraw through the use of keyboard shortcuts, tips, techniques, and illustrations used in this step by step guide. The things this book has in stock for you are: Fundamental Knowledge of Keyboard Shortcuts: Definition of Computer Keyboard, Ways To Improve In Your Typing Skill, Mouse, Definition Of Keyboard Shortcuts, Why You Should Use Shortcuts, Ways To Become A Lover Of Shortcuts, How To Learn New Shortcut Keys, Your Reward For Knowing Shortcut Keys, Why We Emphasize On The Use of Shortcuts. 15 (Fifteen) Special Keyboard Shortcuts. Tips, Tricks, Techniques, and Keyboard Shortcuts for use in CorelDraw *Vectorization: Convert to Vector Images with PowerTRACE, A Primer on Vectorization with PowerTRACE, Before You Begin Converting Your Image, Tracing an Exported Bitmap to Vector, Tracing a Scanned Bitmap to Vector. *Customize CorelDRAW Graphics Suite to Fit Your Workflow. *What Makes a Workspace a Workspace? *Switching Between Workspaces: Customizing Toolbars Interactively, Customizing Shortcut Keys, Saving Your Workspace, Exporting Your Workspace. *Setting Document Defaults: Restoring Your Workspace to Factory Defaults. *Improving the Color of Dull Photos. *Keyboard Shortcuts for use in CorelDraw. Allow this book to show you how to use the impressively organized features of CorelDraw to create eye catching marketing materials and lots more

This book is useful for IGNOU MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCSE-003: Artificial Intelligence and Knowledge Management Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Concept of Intelligence, Artificial intelligence, definition turning test, areas of application. Search techniques, state space, Production rules, problem characteristics, production system characteristic, depth first, breadth first search methods and their analysis, Heuristic search method, generate and test, hill climbing, best first method, graph search, AND OR search methods, constraint satisfaction, backtracking. Introduction to list and string processing and dynamic databases concept of knowledge, characteristics and representation schemes, Logic, propositional and predicate calculus, resolution, semantics nets, frames, conceptual dependency, scripts Monotonic reasoning, logical reasoning induction, natural deduction. Nonmonotonic reasoning – default reasoning minimalist reasoning, statistical reasoning –Baye’s theorem, certainty factors, Dempster Shafer theory, Fuzzy logic. Concept of expert system, need for an expert system, Component and categories of an expert system, need for an expert system, Stages in the development of an expert system. Published by MeetCoogle

This text maintains the tradition established in previous volumes in that it is catered both to the educational public and the university student, providing fresh research and valuable information concerning relevant topics from social and educational backgrounds. Authored by a selected group of experts, members of the Human Development research group, the essays investigate key topics such as leadership, arts, education, pedagogy, linguistics, psychology and sports. The contributors, based at the Catholic University of Murcia, Spain, consider a number of social issues and challenges pertinent to, and present in, contemporary life.

Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Combination Circuits, Logic Gates, Sequential circuits, Registers, I/O Interface, Instruction and Addressing, CPU design, Memory systems, virtual and cache memory. Input and Output Organization: Asynchronous data transfer, Direct Memory access, I/O processors, serial communication. Basics of Computer Organization: System buses and instruction cycles, memory subsystem organizing and interfacing and much more. Published by MeetCoogle

Complemented by hundreds of illustrations, a comprehensive resource on the latest version of PHP, the dominant programming language of the Web, demonstrates how to develop a variety of dynamic Web applications--including guest books, chat rooms, and shopping carts--with coverage of data handling, databases, object-oriented programming, AJAX, XML, security issues, and other topics. Original. (Intermediate)

Microsoft’s Active Server Pages are dynamic Web pages that are capable of changing every time they are viewed. Using ASP is actually a fairly difficult programming task. This book provides a solid guide to developing ASP for use in a professional environment. CD includes all of the code that is in the book plus sample ASP applications that are ready to run.

Management cases are an inseparable part of any Business School class. Cases help students understand complex business situations, apply theoretical knowledge and learn to articulate their opinions before any audience. The cases can be valuable to both students and instructors alike because one learns better when actively engaged. Tedious theoretical concepts are retained longer and understood better when they are applied to real life situations and discussed in classrooms extensively. These deliberations have an inherent benefit of honing their convincing and negotiation skills and developing communication capabilities. Case discussions and presentations also develop team building and inter-personal skills. This book contains narrations of various business scenarios which require critical thinking and strategic decision making. They begin with the central problem and go on as an interesting story, culminating at a point which requires responses from its readers. They may talk of a fundamental business issue but are narrated in a suspenseful, stylised and exciting context. This book is aimed at management students, scholars and executives working in the corporate.

This book is useful for IGNOU BA PHILOSOPHY groups of students. It contains previous years solved papers that enable students learn about the subject and prepare for their examinations. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU BPY-004 RELIGIONS OF THE WORLD (SOLVED) Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations...In this book, Detailed Explanatory Answers have been provided for the questions for Better Understanding of the Candidates. Hope you find it useful and Best of Luck for your Examination. Published by MeetCoogle

This comprehensive book is specially developed for the candidates of Delhi University: B.Tech (Information Technology & Mathematical Innovations) Entrance Exam. This book includes Model Paper & Study Material for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates.

What is this book about? JavaScript is the language of the Web. Used for programming all major browsers, JavaScript gives you the ability to enhance your web site by creating interactive, dynamic, and personalized pages. Our focus in this book is on client-side scripting, but JavaScript is also hugely popular as a scripting language in server-side environments, a subject that we cover in later chapters. What does this book cover? Beginning JavaScript assumes no prior knowledge of programming languages, but will teach you all the fundamental concepts that you need as you progress. After covering the core JavaScript language, you’ll move on to learn about more advanced techniques, including Dynamic HTML, using cookies, debugging techniques, and server-side scripting with ASP. By the end of this book, you will have mastered the art of using JavaScript to create dynamic and professional-looking web pages. Here are a few of the things you’ll learn in this book: Fundamental programming concepts Comprehensive practical tutorial in JavaScript Cross-browser scripting, including Netscape 6 Cookie creation and use Plug-ins and ActiveX controls Dynamic HTML Scripting the W3C DOM Server-side JavaScript with ASP Who is this book for? This book is for anyone who wants to learn JavaScript. You will need a very basic knowledge of HTML, but no prior programming experience is necessary. Whether you want to pick up some programming skills, or want to find out how to transfer your existing programming knowledge to the Web, then this book is for you. All you need is a text editor (like Notepad) and a browser, and you’re ready to go!

This is an introduction to the use of the Linux operating system and some of the popular applications that are bundled with most Linux distributions. This book aims to be the perfect hand-holding guide for those who have some experience of the Windows operating system but now want to explore Linux for the first time. The book begins by relating the evolution of Linux and examines various popular distributions such as RedHat, Mandrake and SuSE. It advises how to prepare a computer so that Linux can be installed alongside a Windows operating system - this means that Linux need not replace the familiar Windows environment. Step-by-step instructions are provided to allow the reader to install Linux on their own computer. These include screenshots of each step together with clear explanations and useful tips.Chapter 1: Introducing LinuxChapter 2: Installing LinuxChapter 3: Configuring hardware for LinuxChapter 4: Exploring the KDE desktopChapter 5: Surfing the webChapter 6: Touring the Linux file structureChapter 7: Handling filesChapter 8: Working in a Linux office suiteChapter 9: Creating graphicsChapter 10: Playing sound and videoChapter 11: Using the Linux shellChapter 12: Scripting for the shellChapter 13: Extending your Linux system

A hands-on introduction to programming with Visual Basic for DOS, including a disk containing all the program code covered. This book takes a painless approach that first-time users will find reassuring--a quick-start, step-by-step tutorial on object-oriented programming; dozens of easy-to-follow sample programs; helpful icons highlighting special tips and warnings; and a rich supply of screen images.

This book has been designed for B.E., MCA, BCA or M.Sc students as well as any user of information technology. It brings to you a comprehensive, up-to-date coverage of all the essential aspects of computers and information technology and their applications. Starting with an overview of the subject, it goes on to cover CPU architecture & processing of data, I/O devices, storage devices, software concepts, computer virus, data communication & networks, operating systems, file organization, database design & management, SQL, number system & conversion, digital electronics, and programming.The author’s aim is to link the knowledge you acquire from this book to the practical applications of IT that we see all around today. Hence come the chapters on Internet, E-mail, Intranet, MS Word, Excel and PowerPoint.The author has adopted a reader-friendly, engaging style that is aimed at evoking your interest first in the subject and then in its practical daily applications. The language is lucid and the descriptions are clear. Each chapter is followed by a large number of Review Questions and their answers. Overall, the book is informative as much as exciting.
