Blueprint for Action provides a framework for understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a "quick fix" notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

A Typological Approach
Walter de Gruyter

Syntax – the study of sentence structure – has been at the centre of generative linguistics from its inception and has developed rapidly and in various directions. The Cambridge Handbook of

Generative Syntax provides a historical context for what is happening in the field of generative syntax today, a survey of the various generative approaches to syntactic structure available in the literature and an overview of the state of the art in the principal modules of the theory and the interfaces with semantics, phonology, information structure and sentence processing, as well as linguistic variation and language acquisition. This indispensable resource for advanced students, professional linguists (generative and non-generative alike) and scholars in related fields of inquiry presents a comprehensive survey of the field of generative syntactic research in all its variety, written by leading experts and providing a proper sense of the range of syntactic theories calling themselves generative.

Building on the work of International Political Economy scholar Susan Strange, this multidisciplinary volume features experts from political science, anthropology, law, criminology, women's and gender studies, and Science and Technology Studies, who consider how the control of knowledge is shaping our everyday lives. suffering, her actions helped postpone the fall of Rome and had massive, widespread impact on the empire that can still be felt today. She watched the barbarian king Alaric and his horde of Visigoth warriors sack Rome, slaughter many of the city's inhabitants, and take her hostage. Surviving captivity, Galla Placidia became the queen of the barbarians who had imprisoned her. Eventually, she became the only woman to rule the Roman empire alone. Soldiers obeyed her commands while Popes and Christian saints alike sought her advice. Despite all obstacles and likely suffering from what we now know as PTSD, she lived to an old age by the standards of the time. This book uses the letters and writings of Galla Placidia's contemporaries to reconstruct, in more depth and detail than has previously been attempted, the remarkable story of her life and the decline and fall of the Roman Empire.

Urbanization is a global phenomenon and the book emphasizes that this is not just a social-technological process. It is also a social-ecological process where cities are places for nature, and where cities also are dependent on, and have impacts on, the biosphere at different scales from local to global. The book is a global assessment and delivers four main conclusions: Urban areas are expanding faster than urban populations. Half the increase in urban land across the world over the next 20 years will occur in Asia, with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns, which together will have significant impacts on net primary production, ecosystem health, and biodiversity Urban expansion will heavily draw on natural resources, including water, on a global scale, and will often consume prime agricultural land, with knock-on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted, which will constrain the protection of biodiversity and management of ecosystem

services

Emperor Taizong (r. 626-49) of the Tang is remembered as an exemplary ruler. This study addresses that aura of virtuous sovereignty and Taizong's construction of a reputation for moral rulership through his own literary writings—with particular attention to his poetry. The author highlights the relationship between historiography and the literary and rhetorical strategies of sovereignty, contending that, for Taizong, and for the concept of sovereignty in general, politics is inextricable from cultural production. The work focuses on Taizong's literary writings that speak directly to

the relationship between cultural form and sovereign power, as well as on the question of how the Tang negotiated dynastic identity through literary stylistics. The author maintains that Taizong's writings may have been self-serving at times, representing strategic attempts to control his self-image in the eyes of his court and empire, but that they also become the ideal image to which his self was normatively bound. This is the paradox at the heart of imperial authorship: Taizong was simultaneously the author of his representation and was authored by his representation; he was both subject and object of his writings.
