

Sodexo Card Activation

Forensic practice in the community is a neglected subject. There are many books looking at forensic work in secure settings, such as prisons or hospitals, but very little has been written about forensic practice in the community. This book describes the current and exciting developments in this area, for both young people and adults, by leaders in their field. It is in the community where interventions with those who have offended are all ultimately tested. Bringing together a range of book covers: -multisystemic therapy for families, -sexual and violent offending, -learning disabilities, -substance misuse, -risk assessment, prediction and management, -personality disordered offenders -resettlement following custody, -desistance of criminal behaviour, -community interventions. Beginning with an overview of forensic practice in the community, the book addresses policy, practice and ethical issues, focusing on the specific dilemmas facing practitioners and providing a framework to meet the challenge of significantly diverting and reducing the prison population through more effective community intervention with adults and young people and also makes suggestions for the future. This book offers a range of recent case studies, has descriptions of new areas of community practice by those working or studying in that area and covers cutting-edge developments in practice and policy. It will be of interest to academics, practitioners and students in forensic psychology, police officers, criminal justice agencies and mental health professionals.

Sleek contemporary kitchens, country kitchens old and new, kitchens tailor made to your every need: it's the center of your home, so make sure the kitchen's warm, welcoming, and practical too. It's simple, with these affordable, achievable decorating styles--plus actual floorplans. From small city kitchens to expansive spaces, every one illustrates the elements of good design, and will help you make basic decisions about layout, storage, appliances, and lighting, as well as decorative ideas. Some organizations pay a great deal of attention to ensuring the physical safety of their team members, but do the team members feel safe enough to speak up and raise tough concerns? Share bold and still-in-formation ideas? In this book, bestselling authors and inclusion experts Frederick A. Miller and Judith H. Katz introduce the concept of "interaction safety" and demonstrate how it can help create a work environment of trust, inclusion, and collaboration. Interaction safety can be brave enough to reach for higher goals and more ambitious possibilities. When interaction safety exists, people know they will not be penalized, ostracized, demoted, made small, discounted, or shunned because of their thoughts, contributions, and conversations. Individuals feel encouraged, empowered, and can achieve more together than they would alone. Miller and Katz provide a four-level model for assessing and increasing the interaction safety in organizations, illustrated by concrete actions team members, leaders, and organizations can take to build and maintain a productive, collaborative, and innovative environment in which people do their best work individually and collectively. When interaction safety is a way of life, the energy people used to spend walking on eggshells, trying to get their ideas heard, navigating minefields, or avoiding those they distrust can instead be put towards doing their best work and winning bigger for the organization. We hope that the organization and individuals can soar!

Written by India's top celebrity chef and one of the leading diabetes dietitians, this unique book offers dietary advice and healthy authentic recipes for anyone who wants to control their diabetes while enjoying delicious Indian dishes.

As the outcome of the sixth international congress, the papers in this volume cover a wide range of topics related to the main theme of the conference, titled "Current Debates in Social Sciences", and basically focus on economics and econometrics. Even though most of the papers deal with the empirical analysis, there are also studies on economic debate. In this context, the articles in the book draw attention to the different aspects of economics and econometrics such as behaviour, electricity consumption and growth relations, game theory, health status of females, impact of the Chinese economy on Turkish economy. We believe that these studies would contribute to the development of debates in social sciences and encourage interdisciplinary approaches.

This book provides the reader with the key multi functional engineering building blocks required for implementing proper Maintenance and Facilities Management. It is an accumulation of more than 30 years of "on the job" multi disciplined general engineering knowledge and is a synopsis of the expert training gained. It has been written to assist Managers, Engineers, Tradesmen, Apprentice tradesmen or D.I.Y. specialists. System 'know how', increasing equipment efficiency, tight budgets and a commitment to a business's survival. By applying the practical principles and practices outlined. Using hard and soft skills, a business and its personnel will quickly reap the benefits and rewards. This is most effective book I have ever read and truly covers every aspect of Maintenance and Facilities Management. It is compelling, interesting, and ground breaking in its method and approach. I have already applied the material here to excellent effect and would highly recommend it to anyone who ever need on the subjects. I think it will become a standard work in the years to come. - James Hayes - Lead Electrical Engineer, EESL "A must read" for anyone involved in maintenance! Brilliant!! - Peter Rafferty - Mechanical Engineer, FMS

This volume provides practical solutions and introduces recent theoretical developments in risk management, pricing of credit derivatives, quantification of volatility and copula modeling. This third edition is devoted to modern analysis based on quantitative methods and textual analytics to meet the current challenges in banking and finance. It includes 14 new contributions and presents a comprehensive, state-of-the-art treatment of cutting-edge methods and topics, such as market liquidity, and realized volatility. The book is divided into three parts: Part 1 revisits important market risk issues, while Part 2 introduces novel concepts in credit risk and its management along with updated quantitative methods. The third part discusses the dynamics of risk management and includes risk analysis of energy markets and for cryptocurrencies. Digital assets, such as blockchain-based currencies, have become popular but are theoretically challenging when based on modern text-mining method called dynamic topic modeling in detail and applies it to the message board of Bitcoins. The unique synthesis of theory and practice supported by computational tools is reflected not only in the selection of topics, but also in the fine balance of scientific contributions on practical implementation and theoretical concepts. This link between theory and practice offers theoreticians insights into considerations of applicability and, vice versa, provides practitioners with a practical perspective. Hence the book will appeal both to researchers, including master and PhD students, and practitioners, such as financial engineers. The results presented in the book are fully reproducible and all quantlets needed for calculations are provided on an accompanying website. The Quantlet platform quantlet.de, quantlet.com, quantlet.org is an integrated QuantNet environment consisting of different types of statistics-related documents and program codes. Its goal is to promote reproducibility and to the social web. QuantNet and the corresponding Data-Driven Documents-based visualization allows readers to reproduce the tables, pictures and calculations inside this Springer book.

[Keys to Healthy Eating Anatomical Chart](#) has been updated with changes from the USDA's 2010 Dietary Guidelines. This chart contains excellent descriptions of fats, types of cholesterol, carbohydrates (including the Glycemic Index), protein, and fiber. It also features a useful step-by-step guide of how to read a food label and provides information on the latest food pyramid.

Coroner's Law is an area that attracts great public scrutiny, reflected in the recent establishment of the office of the Chief Coroner, and the number of Judges of the High Court and the Court of Appeal made deputy assistant coroners to particularly sensitive inquests. It is also an area of law that has changed significantly in recent years since the new Coroners and Justice Act 2009 came into force in 2013. This book provides practitioners with an up-to-date and comprehensive guide to the law of coroners and inquests. Written by barristers practising in the field, it addresses changes to the structure and jurisdiction of coroners' courts in a straightforward, accessible manner. The book is helpfully structured according to the elements of an inquest or the subject matter of a coroner's investigation. Each chapter provides an overview of the legal issues, statutory material and other sources of guidance, followed by case summaries and extracts where the relevant issues are discussed. In addition, there are useful appendices of relevant materials, including applicable legislation and the Chief Coroner's Guidance. The book is an essential companion for practitioners of coronial law, indispensable to novices and seasoned practitioners alike.

The world 's ageing population is increasing and food professionals will have to address the needs of older generations more closely in the future. This unique volume reviews the characteristics of the ageing population as food consumers, the role of nutrition in healthy ageing and the design of food products and services for the elderly. Chapters in part one discuss aspects of the elderly 's relationship with food such as appetite and ageing, ageing and sensory perception, food and satisfaction with life, and the social significance of meals. The second part of the book reviews the role of nutrition in extending functionality into later years, with chapters on topics such as undernutrition and conditions such as Alzheimer's disease, bone and joint health and eye-related disorders. Concluding chapters address the issues of food safety and the elderly, designing new foods and beverages for the ageing and nutrition education programmes. With its distinguished editors and contributors, Food for the ageing population is an essential reference for those involved in the research, development and provision of food products for the older generation. A unique review of the characteristics of the ageing population as food consumers Discusses aspects of the elderly's relationship with food, including appetite, ageing and sensory perception and the social significance of meals Examines the role of nutrition in extending functionality in later years, focusing on undernutrition, Alzheimers and bone and joint health

The OECD Skills Strategy provides a strategic and comprehensive approach for ensuring that people and countries have the skills to thrive in a complex, interconnected and rapidly changing world. The updated 2019 OECD Skills Strategy takes account of the lessons learned from applying the original skills strategy in 11 countries since 2012...

The marketing landscape has changed dramatically in recent years, especially for tourism and hospitality practitioners. Marketing for these industries is now a multi-dimensional, collaborative venture driven by technological change and the growing demand for authentic co-created experiences. Marketing for Tourism and Hospitality provides students with a contemporary, accessible and useful resource as they prepare to encounter the complexities and challenges of tourism and hospitality marketing globally. A clear articulation of the changing landscape, a comprehensive introduction to the three underpinning themes of collaboration, technology and experiences, and a plentiful supply of international case material provide students with an enjoyable and digestible resource that is both academically rigorous and practice-oriented, helping them prepare for day-to-day problems in the dynamic world of marketing. This contemporary, challenging and highly applied text is an indispensable resource for all students of tourism and hospitality degree programmes.

This updated Fourth Edition continues to serve as a comprehensive introduction to family medicine. Written at the clerkship level, it groups chapters into three sections: Principles of Family Medicine, Promoting Health throughout Life, and Common Problems. New to this edition is a feature called Careers in Family Medicine, three additional chapters, and a division of respiratory tract infections expanded and split into upper and lower. Its user-friendly style makes the book a lasting companion tool for the approach to diagnosing and treating common problems. Comes with a CD-ROM that contains 100 USMLE-style questions with explanations to accompany the text.

A good estate strategy is an integral part of healthcare planning. This publication gives best practice advice and includes sample strategies in the form of case studies. It is complemented by two other publications: "Estatecode", which includes a section on property appraisal, and "Capital Investment Manual", which sets out the process for procuring new capital assets.

When to climate change related uncertainties and anticipated population growth, different parts of the developing and the developed world (particularly urban areas) are experiencing water shortages or flooding and security of fit-for-purpose supplies is becoming a major issue. The emphasis on decentralized alternative water supply systems has increased considerably. Most of the information on such systems is either scattered or focuses on large scale reuse with little consideration given to decentralized small to medium scale systems. Alternative Water Supply Systems brings together recent research into the available and innovative options and additionally shares experiences from a wide range of contexts from both developed and developing countries. Alternative Water Supply Systems covers technical, social, financial and institutional aspects associated with decentralized alternative water supply systems. These include systems for greywater recycling, rainwater harvesting, recovery of water through condensation and sewer mining. A number of case studies from the UK, the USA, Australia and the developing world are presented to discuss associated environmental and health implications. The book provides insights into a range of aspects associated with alternative water supply systems and an evidence base (through case studies) on potential water savings and trade-offs. The information organized in the book is aimed at facilitating wider uptake of context specific alternatives at a decentralized scale mainly in urban areas. This book is a key reference for postgraduate level students and researchers interested in environmental engineering, water resources management, urban planning and resource efficiency, water demand management, building service engineering and sustainable architecture. It provides practical insights for water professionals such as systems designers, operators, and decision makers responsible for planning and delivering sustainable water management in urban areas through the implementation of decentralized water recycling. Authors: Fayyaz Ali Memon, Centre for Water Systems, University of Exeter, UK and Sarah Ward, Centre for Water Systems, University of Exeter, UK

First published in 1990, this is the leading guide to law firms throughout Europe, Middle East and Africa. Researched by the team, through first-hand interviews with lawyers and clients, the book includes coverage of the legal markets in more than 60 jurisdictions.

On the night of 8 November 2016, at 8:15 pm, India 's Prime Minister, Narendra Modi, announced in a televised broadcast to the nation that with effect from midnight, currency notes of denominations Rs 500 and Rs 1,000 would no longer be legal tender. In one stroke, this involved the de-recognition of over 86 per cent of the value of Indian currency in circulation with only four hours ' notice. This important book provides a quick and concise explanation of the goals, implications, initial effects and the political economy of this major demonetisation move by the Government of India. It clarifies key concepts and offers astute economic analysis to guide the reader through the various claims, arguments and critiques that have been made; highlights the complexities of the processes that have been unleashed; and examines the likely outcomes in the long term as well as those that are immediately evident. Timely and lucid, this book will interest students and researchers in the fields of economics, finance, management, law, politics and governance as well as policy makers, legislators, civil society activists and the media.

Austerity, a response to the aftermath of the financial crisis, continues to devastate contemporary Britain. In The Violence of Austerity, Vickie Cooper and David Whyte bring together the voices of campaigners and academics including Danny Dorling, Mary O'Hara and Rizwaan Sabir to show that rather than stimulating economic growth, austerity policies have led to a dismantling of the social systems that operated as a buffer against economic hardship, exposing austerity to be a form of systematic violence.Covering a range of contentious issues in institutional violence in Britain, the book argues that police attacks on the homeless, violent evictions in rented sector, the risks faced by people on welfare schemes, community violence in Northern Ireland and cuts to the regulation of social protection, are all being driven by reductions in public sector funding. The result is a shocking exposé of the myriads of ways in which austerity policies harm people in Britain.

The focus of this book has been on the 200 or so regulations and the 53 Approved codes of practice owned by the Health and Safety Executive, which concentrates on areas where evidence and attribution have indicated that regulators are putting undue trusts on business whilst doing little to improve health and safety outcomes. The general sweep of requirements set out in health and safety legislation are broadly fit for purpose but there are a few that offer little benefit to health and safety and which the government should remove, revise or clarify, in particular the duties for self-employed people whose work activities pose no potential risk of harm to others. The much bigger problem is that regulator requirements are misunderstood and applied inappropriately and recommendations are put forward to address this. They seek to: streamline the body of regulation; re-direct enforcement activity towards business where there is the greatest risk of injury or ill health; re-balancing the civil justice system by clarifying the status of pre-action protocols and reviewing strict liability provisions

A story about an elephant who is allergic to peanuts that teaches young children to be aware of their friends' peanut allergies. Mentions foods in which peanuts are hidden ingredients.

How do you keep your employees engaged, creative, innovative, and productive? Simple: Work human! From the pioneers of the management strategy that's transforming businesses worldwide, Making Work Human shows how to implement a culture of performance and gratitude in the workplace—and seize a competitive edge, increase profitability, and drive business momentum. Leaders of Workhuman, the world's fastest-growing social recognition and continuous performance management platform, Eric Mosley and Derek Irvine use game-changing data analytics to prove that when a workplace becomes more "human"—when it's fueled by a culture of gratitude—measurable business results follow. In Making Work Human, they show you how to: Apply analytics and artificial intelligence in ways that make work more human, not less Expand equity, diversity, and inclusion initiatives and strategies to include a wider range of backgrounds, life experiences, and capabilities Use recognition as an actionable strategy to create a truly inclusive, connected culture "The qualities that make us most human—connection, community, positivity, belonging, and a sense of meaning—have become the corporate fuel for getting things done—for innovating, for thriving in the global marketplace, and for outperforming the competition," the authors write. By building a sense of belonging, purpose, meaning, happiness, and energy in every employee, you'll create a profound connection between your organization and its goals. And Making Work Human provides everything you need to get there. Co-production and co-creation occur when citizens participate actively in delivering and designing the services they receive. It has come increasingly onto the agenda of policymakers, as interest in citizen participation has more generally soared. Expectations are high and it is regarded as a possible solution to the public sector's decreased legitimacy and dwindling resources, by accessing more of society's capacities. In addition, it is seen as part of a more general drive to reinvigorate voluntary participation and strengthen social cohesion in an increasingly fragmented and individualized society. "Co-Production and Co-Creation: Engaging Citizens in Public Services" offers a systematic and comprehensive theoretical and empirical examination of the concepts of co-production and co-creation and their application in practice. It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level, academics and reflective practitioners. It addresses the topics with regard to co-production and co-creation and will be of interest to researchers, academics, policymakers, and students in the fields of public administration, business administration, economics, political science, public management, political science service management, sociology and voluntary sector studies.

To battle the obesity epidemic in America, health care professionals and policymakers need relevant, useful data on the effectiveness of obesity prevention policies and programs. Bridging the Evidence Gap in Obesity Prevention identifies a new approach to decision making and research on obesity prevention to use a systems perspective to gain a broader understanding of the context of obesity and the many factors that influence it.

The correspondent central banking model (CCBM) was introduced by the Eurosystem at the start of Stage Three of Economic and Monetary Union (EMU) in January 1999. Its main purpose is to ensure that all marketable and non-marketable assets eligible for use in monetary policy operations or to obtain liquidity in TARGET2 are made available to all its counterparties, regardless of where the assets or the counterparty are situated. L Links between securities settlement systems (SSSS) in various countries have been established for some time. Insofar as the ECB's Governing Council has deemed such links eligible for use in Eurosystem credit operations, they represent a valid alternative to the CCBM. It is also possible for Eurosystem counterparties to use the aforementioned links in combination with the CCBM for the purposes of Eurosystem credit operations. In addition, triparty collateral management services offered by triparty agents (TPAs) on a cross-border basis are supported via the CCBM (as of 29 September 2014), subject to the respective triparty agents having been approved as eligible for use in Eurosystem credit operations. The purpose of this book is to explain to the Eurosystem's counterparties and other market participants involved in CCBM procedures how the CCBM works, and to give a general overview of the model's main features and evolution. For further information, counterparties should contact the national central banks (NCBs) of the Eurosystem.

There are books out there on every baby-related topic imaginable. But how about one that helps you plan your return to work, ease your concerns and fears about the transition so you can focus on your baby, introduce you to a community of otherreturning-to-work mamas, and empower you to make calm and thoughtful choices? Back to Work After Baby fills this much-needed gap. Whether you are a brand new mom wondering how this return from maternity leave will go or it's your second or third return, Back to Work After Baby will inspire you with new ideas on how to approach the return with a healthy mindset, tackle all those logistics, view your leave and return as a leadership opportunity, and commit to staying in community with other working mamas.

In 1990 the Carnegie Foundation for the Advancement of Teaching published a classic report on the loss of a meaningful, stable basis for true community on college campuses--and in the nation. Now this expanded edition of Campus Life reintroduces educational leaders to the report's proposals while offering up-to-date analysis and recommendations for Christian campuses today.

Frank Field was commission by the Prime Minister in June 2010 to provide an independent review on poverty and life chances. This is the final report and the aim of the review was to; generate a broader debate about the nature and extent of poverty in the UK, examine the case for reforms to poverty measures, in particular for the inclusion of non-financial elements, explore how a child's home environment affect their chances of being ready to take full advantage of their schooling, recommend potential action by government and other institution to reduce poverty and enhance life chances for the least advantage consistent with the Government's fiscal strategy. The report demands a broadening of the attack on child poverty and supplies overwhelming evidence that children's life chances are most heavily predicated on their development in the first five years of like. Its family background, parental education, good parenting and the opportunities for learning and development in those crucial years that together matter more to children than money. The Review has concluded that the UK needs to address the issue of child poverty in a fundamentally different way if it is to make a real change to children's life chances as an adult.

This book uses a multimethod approach to examine local experience of contemporary mining development in the Peruvian Andes, creating an understanding of the transformations that rural societies experience in this context. Mining is a major component of economic growth in many resource endowed countries, whilst also causing mixed social, cultural, and environmental effects. Most current literature on contemporary mining in Peru is largely focussed on conflict; however, in this text, the author takes a differing approach by examining the experiences of families in the vicinity of Rio Tinto's La Granja exploration copper project, Northern Peru, an area with great significance due to the mining investment and development, which has taken place over the past 25 years. The book first provides a critical discussion about production of space theories, and debates on spatial mobility, highlighting their relevance to understanding large-scale mining developments, especially in the Peruvian Andes. The following chapters analyze spatial transformations mining development has prompted, focusing on four axes: access to space, production, mobility, and representations of space. A comprehensive narrative is constructed drawing on diverse voices and perspectives, including those of family heads and their partners, local leaders, company employees, and social scientists. The book concludes by discussing how the findings challenge some of the current accounts of the social effects of mining developement on rural communities and pose significant implications for sustainable development programs and place-based practices. By taking an interdisciplinary approach, this book will appeal to a wide audience including geographers, social anthropologists, and social scientists interested in the social effects of mining as well as researchers interested in current Latin American Studies and Rural Development.

Like every other creature, we, the humans take birth, make our living and die. But why? What is the purpose of our life? Are we born to code software or play sports? Are we happy in what we do or will we be happy if we become (or rather earn) like our favourite singer, sportsman or actor? Who is responsible for our wrong career choices? Is it our parents? If we are really so obedient do we really listen to parents when they stop us from becoming alcoholic or drug addict. However, is drug addiction really bad? If yes, why did Almighty create drugs? Doesn't he want us to live a good life? All our life we are taught to give up our anger and other such evils. But if these are the evils why doesn't the Almighty finish it off for once and all? Why are we born with these evils at all? What is its purpose ultimately? Everybody is afraid of doing wrong things; rather we all are programmed like that. But then why do we find too many rogue people around? Everyone thinks she/# lives virtuously then who are these sinners - your neighbours? But you too are somebody's neighbour! Many believe that such rogue people are punished in hell; almighty punishes them. But can almighty punish its own creations? And if punishments in hell are to make people good, the way we have courts of law which sentences people to make them virtuous, when will everyone become virtuous? Why can't it be done in a snap with the magic wand; He is the almighty after all? What if you are asked to build software to track people's sins for the almighty to make better judgement? If after spending half of your life you realise that you've travelled entirely the wrong path in your life what would you do? If you are given an opportunity to restart your life from a particular point in past, what point would that be? And what different would you do in this second opportunity; would you live your dream at least when the Almighty himself tells you what's your life's purpose? Read to find out answers to such questions, in an exciting journey full of

Kaam, Krodh, Lobh, Moh and Bhay in this book. Few ideas are thrown in the book, which may have already been implemented in another part of the world in a different form. Or maybe not! Like, if money is the root of all evils, why not get rid of it? The protagonist tries to use 'Time' as currency. Does he succeed in his attempt?

Top 100 indirect tax rulings of 2017 is your guide to the key indirect tax judgments under Service Tax, Central Excise, Customs, Foreign Trade Policy (FTP) and Value Added Tax (VAT) delivered during the course of the year. The book outlines Top 100 rulings along with concise summary of each case, covering facts and significant observations of Tribunal/Court as the case may be. 'Renowned Tax Experts' have

given their take on Top 10 judgments of 2017, putting forth their views on the likely industry impact and way forward. The book gives an overview of the ongoing litigation under the GST regime, covering various issues like taxability of supplies, availability of Input Tax Credit and applicability of reverse charge mechanism, detention and seizure of goods for non-compliance, entitlement to exemption and concessions and more.

Declare Y.E.S. loud and clear to create new possibilities in your life and leadership.

The Superintendent of Buildings & Grounds Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: supervision; operation and maintenance of physical plants, including HVAC systems; building repair, maintenance and cleaning; grounds maintenance; plans and specifications; mathematics; administrative techniques and practices; and other related areas.

An overview of farm-to-fork safety in the preharvest realm Foodborne outbreaks continue to take lives and harm economies, making controlling the entry of pathogens into the food supply a priority. Preharvest factors have been the cause of numerous outbreaks, including Listeria in melons, Salmonella associated with tomatoes, and Shiga toxin-producing E.coli in beef products, yet most traditional control measures and regulations occur at the postharvest stage. Preharvest Food Safety covers a broad swath of knowledge surrounding topics of safety at the preharvest and harvest stages, focusing on problems for specific food sources and food pathogens, as well as new tools and potential solutions. Led by editors Siddhartha Thakur and Kalmia Kniel, a team of expert authors provides insights into critical themes surrounding preharvest food safety, including Challenges specific to meat, seafood, dairy, egg, produce, grain, and nut production Established and emerging foodborne and agriculture-related pathogens Influences of external factors such as climate change and the growing local-foods trend Regulatory issues from both US and EU perspectives Use of pre- and probiotics, molecular tools, mathematical modeling, and one health approaches Intended to encourage the scientific community and food industry stakeholders to advance their knowledge of the developments and challenges associated with preharvest food safety, this book addresses the current state of the field and provides a diverse array of chapters focused on a variety of food commodities and microbiological hazards.

This timely resource offers fresh research on companies' use of social media platforms—from Twitter and Facebook to LinkedIn and other career sites—to find and hire personnel. Its balanced approach explains why and how social media are commonly used in both employee recruitment and selection, exploring relevant theoretical constructs and practical considerations about their appropriateness and validity. Contributors clarify a confusing cyberscape with recommendations and best practices, legal and ethical issues, pitfalls and problems, and possibilities for standardization. And the book's insights on emerging and anticipated developments will keep the reader abreast of the field as it evolves. Included in the coverage: · Social media as a personnel selection and hiring resource: Reservations and recommendations. · Game-thinking within social media to recruit and select job candidates. · Social media, big data, and employment decisions. · The use of social media by BRIC nations during the selection process. · Legal concerns when considering social media data in selection. · Online exclusion: Biases that may arise when using social media in talent acquisition. · Is John Smith really John Smith?

Misrepresentations and misattributions of candidates using social media and social networking sites. Social Media in Employee Selection and Recruitment is a bedrock reference for industrial/organizational psychology and human resources academics currently or planning to conduct research in this area, as well as for academic libraries. Practitioners considering consulting social media as part of human resource planning or selection system design will find it a straight-talking guide to staying competitive.
