[PRINCIPLES OF HOTEL STAR RATINGS](#)

[Educational Strategies for the Next Generation Leaders in Hotel Management](#)

Hotel rating systems are used in almost all countries. The policy makers, managers, and researchers take this process seriously, and contribute in enhancing the system to reflect the needs of the modern traveler. Hotels also invest a lot for getting the desired star ratings. However, at the same time, apart from the guidelines and manuals of the star rating schemes, there is hardly any reliable source of information explaining the principles on which the star rating process is based. The available information can be confusing as different rating systems have different criteria for hotel evaluation. Considering this challenge, this book attempts to bring the star rating process to life through the principles of service quality management because hotel rating systems claim to raise standards of service. Such principles were identified through hundreds of research studies and existing hotel rating systems around the world. This book focusses on making the hotel rating process simple to understand for the benefit of students, managers, and policymakers.

Many standard BOP models have been undergoing radical transformations. Newer functioning models with inclusivity with holistic, systems approach is the mantra. Development has morphed into community leadership, and societal fabric building now frames the effect of corporate governance activities on shareholder value. Not surprisingly, new voices have been calling for reinvention of marketing. CEO's cannot get clear, compelling answers about marketing's impact on the bottom line. The adage of Sam Wanamaker- that he knows that 50 percent of his advertisement works but he does not know which half –still haunts management. Consider the following: Economic liberalisation has given a new impetus to the hospitality industry. It costs an average of US\$50-80 million to set up five-star hotels with 300 rentable rooms in India. The gestation period is usually between three and four years. Movements in real estate prices have to be watched, though they have stabilised in the past three years or so. Non-five-star hotels are obviously cheaper and have smaller gestation periods, but international chains are expected to go into the five-star category. Biswajit Pattajoshi offers not only a candid critique of eradicating poverty, through bottom of pyramid spins but more important a clear agenda –indeed the Samaritans agenda- for meaningful change in end of poverty by immortal brand equity white horse. He calls upon leadership to deliver value and solutions, not physicality colours. He believes that the stalwart must understand their building blocks and operations from finance to supplier partnerships. They must co-operate and compete on multidisciplinary teams, because BOP model fails whenever any part of greater agenda fails to cohort with great acres. BOP's are posing titan challenges to manage marketing tornadoes, many of which are exemplary spectaculars in waves of shareholders. Marketing change agents have led to innovative, community building indispensability models that track futuristic transformation eradicating poverty, establishing peace revolution. If community building model's take-off profits are harnessed by the BOP.
